About the Program

It's a known fact that United Nations Organization has declared Seventeen aspects of human life as Sustainable Development Goals (SDGs) which are to be attained by all nations by 2030. Among the SDGs, Education stands in the fourth place, and indicates that qualitative education with equity and access for all would help to establish a progressive and harmonious society. In alignment with this, India has designed National Education Policy 2020 with an aim at revision and revamp of its existing education system. The policy aims to create a new system which answers the requirements of the younger generation of twenty first century, while building upon India's traditions and value systems. The policy suggests that the education to be holistic, which includes basic arts, crafts, humanities, games, sports, languages, literature, culture and values, in addition to science and mathematics, for the all round development of the learners. Indian Knowledge System is one of those components to be included into the curriculum at UG level.

Indian Knowledge Systems is an area of study which deals with the valuable contributions of Indian society to various fields of Sciences, Social Sciences, Commerce, Arts and Literature. Ancient India was a knowledge hub where significant aspects of knowledge were developed and practiced for thousands of years, in the fields such as Medicine, Physics, Chemistry, Mathematics, Astronomy, Astrology, Economics, Commerce, Arts etc. The flow of these knowledge systems got interrupted in the past few centuries, due to foreign invasions, colonization and various other factors. Hence National Education Policy 2020 finds it important to introduce IKS into the current education system, so that it removes the discontinuity and creates the required awareness among the faculty and students regarding Indian Knowledge Systems. In this context, it is important not only to explore the ancient Indian knowledge systems, but also to clearly map this knowledge with modern scientific advancements and technologies, so that it generates a positive attitude, and initiates the required enthusiasm among the faculty, which further leads to qualitative research in the field of IKS. Thus the FDP aims to familiarize and enthuse the faculty about IKS and identify various strategies to incorporate it into the curriculum.

About the Institution

Government Degree College for Women, Begumpet is a Premier Institution which offers quality education at tertiary level and stands as the first choice of many students in the state. The college was established in the heart of Hyderabad city in 1971. Committed to provide quality education at low cost and no cost, the Institution caters to the diverse needs of girl students. Since its inception as a multi faculty college, it envisages the motto Learning is the Best Ornament. Various Curricular, Co-curricular and Extra- curricular activities of the Institution reflect its vision "Empowerment of Women through Knowledge." It is affiliated to Osmania University and in its fourth cycle of NAAC Accreditation in 2022, it has acquired 'A+' Grade, with 3.5 CGPA and stands as one of the premier institution in the state of Telangana.
