

Haemoglobin Estimation Camp

Department of Microbiology in collaboration with Microbiologists Society India and Red Ribbon club has organized Haemoglobin estimation camp on 6th November 2021. Students of B.Sc. III Year, MBC and MZC have conducted haemoglobin estimation for students of B.Com II year. Around 43 members have got tested their haemoglobin. It is found that haemoglobin for these students was in the range of 6 to 13. We have created awareness about importance of haemoglobin level in our blood. And explained the problems associated with low haemoglobin. We have also suggested measures to increase the haemoglobin i.e. to have more leafy vegetables, carrot, beet root, jaggery, pea nut etc. Students have received our suggestions and were happy with the outcome.
