Concept Note of Seminar

Higher Education plays an important role in the overall development of a nation. It is a crucial segment in every country as individuals play a major role in the growth of the nation by acquiring intellectual capabilities and skills. In fact, education forms the building blocks of the nation. Indeed it is medium to bring in social transformation. Our Higher Education system is the third largest in the world, next only to the United States and China. In the twenty first century it seems education sector is rapidly growing and its access to different sections in society is expanding phenomenally as individuals and nations recognize its role in empowerment. Under graduation and University education is facing a global challenge with respect to structures, institutions and pedagogic practices. The advent of online and digital learning platforms, as well as a newly 'connected world' pose challenges to traditional modes of face-to-face teaching. Yet the
