ttHub is a startup with proficiency of Staffing, Recruitment, Talent Development and Software Development services. This company if formed with group of Directors having potential experience in the industry of Talent Development and Recruitment; we are ready to provide **Temporary and Permanent** manpower to clients across India. With many IT and Non-IT staffing companies in India, we are one of the most successful Staffing and recruitment company in Hyderabad at Telangana.

As part of recruitment services under **ttHub**, we focus on all levels as per the client needs and recruit across industry segments for both MNC's as well as Indian companies. Areas of expertise include IT and Non IT. We can improve the results of recruitment efforts in many cases rapidly. To that end, we have specialists and team to complement your team or even completely work as an extension to your organization as the recruitment department.

Services:
- Domestic Staffing
- Software Development
- Talent Development

Service 1: SOFTWARE DEVELOPMENT & SUPPORT:

A Good Software product is as an asset and not expenditure. A sound investment made to streamline the process and communication across various entities / departments of an organization while having a holistic approach to the core functionality of the organization.

A Software Architect should consider the immediate and long-term needs, lay a strong foundation for future enhancements, and build enough flexibility for dynamic business needs, simple yet intelligent interfaces to give comfort to users of the system, highly secure and reliable, contemporary standards and technology comparable to the best in the world. Good software is work of creativity, a piece of art that invokes admiration.

At ttHub, our aim is to build World-Class software which includes all the points mentioned above and more importantly win our Customers Satisfaction and generate a reaction which can be summed up in one word WOW !!!.

Technology Expertise:

ttHub has a very broad range of technology expertise and encompasses a wide gamut of technologies including:

- Data Analytics, Hadoop, SAS, IOT, Java, .Net, Testing, SOA, etc.
- ERP Technologies (SAP, Oracle Apps, Siebel, JD Edwards, etc.)
- DWH Technologies (Informatica, Abinitio, Cognos, Business objects, etc.)
