AWARENESS PROGRAM BY SHE TEAM

SHE team came to college and addressed the students about various issues regarding safety of students on 01st March 2016. They said Self-defense and self-protection are priorities for women. The most common crime to happen to a woman is rape, but it is more about a feeling of dominance from one person over another rather than actual sex. According to statistics, the majority of rapes are perpetrated by men who women know. Assault on women is also a common crime because assailants assume women will be more passive and not fight back; this has to do with stereotypes of women. The best way for women to fight back against crime is to prevent it from happening by avoiding being alone or being in badly lit areas. However, getting into such situations is sometimes inevitable.

The majority of rapes occur in the victim's home. According to the Bureau of Justice, almost 40 percent of all rapes take place in the female victim's home. In the event that rape prevention fails—such as by avoiding problem areas or making sure a woman is never alone—the best chance for survival is to fight back. Fighting back is not just necessary, but it is a moral right because protecting one's self is paramount. The rest of the article will discuss why self-defense is important, some tools and techniques for effective self-defense, and information on gun use.
