

DEPARTMENT OF MICROBIOLOGY
BEST PRACTICES 2021-22

- We have our own written text books as material for students.
- Regular examination of water samples from RO plant by MPN method.
- Preparation of models by students which makes the concepts easy for other students.
- Involvement of students in study projects.
- We prefer to teach by using latest technologies such as PPTs, Animations etc. to enhance the teaching – learning process.
- The use of plastic bags is avoided.
- Students and staff are motivated to use jute bags or cotton bags
- Department follows a policy of switching on power only when required and switching off when not in use.
- Departmental Library is maintained.
