

Haemoglobin Estimation Camp.

Department of microbiology in collaboration with microbiologists society India and Red Ribbon club has organized Haemoglobin Estimation Camp on 12th November 2021. Students of Bsc. III year MBC & MZC have conducted hemoglobin estimation for students of B.com II year. Around 39 members have got tested their haemoglobin. It is found that hemoglobin for these students was in the range of 6 to 13. We have created awareness about importance of haemoglobin level in our blood and explained the problems associated with low haemoglobin. We have also suggested measures to increase the haemoglobin levels by having more leafy vegetables, carrot, beet root, Jaggery, Pea nut etc. Students have received our suggestions and were happy with the program. Normal range of Hemoglobin for women is between 12-16 ml. Hg.
