Dear P Sunceta

Subject: - Ph. D Registration

We are in receipt of the following documents that you have submitted in connection with registration into a PhD program in the Department of "\_\_\_\_\_\_ Physics \_\_\_\_\_."

1. A demand draft number 289388 drawn on 19-07-2013; Am State Bank of India dated 19-07-2013 drawn in favor of Registrar K L University.

2. Personal declaration (Appendix-AG)

3. Noc

We are pleased to inform you that, you have been selected to be a PART- TIME/FULLresearch scholar in the department of "\_\_\_\_\_Physics

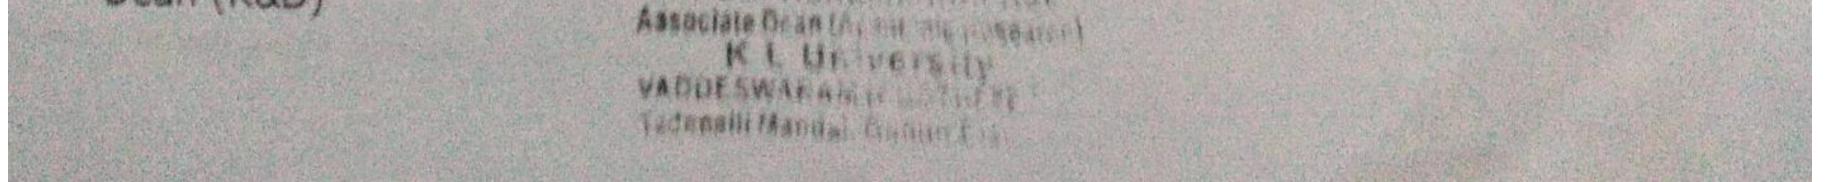

Name of the Supervisor: Dr.M.V. Ramana

Name of the Co-Supervisor: Dr. Ch Uculata Reddy.

You are requested to contact your supervisor for finalization of research Plan, and shall su the same within two months time through your supervisor.

Best Wishes,

Dean (R&D)

\*\*\*\*\*

With ref. to the Ph.D. (Physics) Thesis submitted, the University through its letter ref. cited above has communicated the recommendations and comments of **one** of the examiners who has valued the thesis on **"Bioactive Studies on some Disordered Materials"** (Copy enclosed).

The Research Scholar is directed to answer the queries, revise the thesis as per the specific comments and recommendations made by the examiner and resubmit **two** copies of the thesis after incorporating the corrections and remarks along with the endorsement of the Research Supervisors for taking further necessary action.

Yours faithfully,

DIRECTOR

Copy to: **Dr. M. Chandra Shekar (Co-supervisor),** Retd. Professor of Physics & Former Rector, JNTUH, Kukatpally, Hyderabad-85, T.S. Ms. Kondapati Ashalatha, Research Scholar, Physics, JNTUH, Kukatpally, Hyderabad. The thesis entitled **'Bioactive studies on some Disordered materials is a technologically important area for various medical applications'**. The author has given elaborate review of the literature of her proposed work. However, the author has not highlighted the objectives of his work. The thesis has been divided into four chapters.

**Chapter1** gives introduction to Biomaterials, classification of Biomaterials, Glassy ceramics. It also includes the topics like Bone bonding mechanism of Bioactive glass, glass structure. It also provides a comprehensive review of literature on Bio materials especially on bioactive glasses.

**<u>Chapter2</u>** deals with materials and methods which covers the glass composition and preparation of simulated body fluid, in vitro bioactivity study. The experimental techniques like XRD,SEM, EDX.PH measurements are discussed.

**Chapter3** presents the results of the investigation on bioactivity of disordered Borosilicaphosphate, Borosilicate and phosphate glasses. The author has prepared and characterizes the above mentioned materials to explore the in vitro bioactivity nature. The glasses were synthesized by melt quenching technique. Mostly the glasses were found to be amorphous but some of the glasses were found to be crystalline. The author has not indexed the crystalline glasses. To assess the bioactive nature of the glass samples in vitro studies were carried out by immersing the samples in simulated body fluid for seven days. The PH measurements indicates a variation in PH value for all samples. This concludes that the glass samples have solubility in simulated body fluid and were able to bond with living tissues in vivo. The weight loss measurements for all samples were carried out and the samples show weight loss. Greater weight loss percentage due to immersion in simulated body fluid was observed for phosphate glasses. The presence of peaks in the XRD analysis clearly indicated the presence of crystalline phase of hydroxyl apatite layer on the surface of glasses after immersion in simulated body fluid. The SEM images revealed the formation of hydroxyapatite on the surface of all the glasses.

<u>Chapter4</u> reports the summary and conclusions drawn from the characterization results on Borosilica phosphate, Boro silicate, Boro phosphate glasses doped with Li<sub>2</sub>O, LiCl, LiF, LiBr. It has also included the scope for future work.

The author has selected a very good topic for research but the thesis is not presented systematically and there are grammatical mistakes observed in the presentation of the thesis. The objectives of the thesis are not clearly specified. Some of the XRD found to be crystalline and were not indexed properly. All the above shortfalls can be rectified before the viva-voce examination.

I also strongly advise her to publish the results in peer reviewed journals.
