World Computer Literacy Day

December 2nd 2021

The Department has celebrated World Computer Literacy Day on December 2nd 2021.

World Computer Literacy Day was launched by Indian computer company NIIT to mark its 20th anniversary in 2001, in response to research which suggested that the majority of computer users around the world were men. It occurs annually on 2 December, and is intended to encourage the development of technological skills, particularly among children and women in India. In its own words, it aims to "create awareness and drive digital literacy in underserved communities worldwide". It was originally founded by the [NIIT](#). The day is also directed at improving the teaching of [Information Technology](#), and more generally, the "celebration of computers".

On this occasion, Department has arranged a Special Lecture on "Importance of Digital Literacy". The content of the lecture contains importance on online transactions like netbanking, UPI and digital print of bank account statements and how the people are suffering who are not having knowledge in computers like senior citizens. We also arranged interaction session with the students to resolve the problems of the people who need computer knowledge.
