On

Objectives

This workshop is conducted to help the students to improve their vocabulary. The students are provided with various kinds of improving vocabulary. Mainly they are helped how words are created with the help of root words and word formation.

Researchers have taken notice of the multidimensionality and complication of word knowledge, suggesting that knowing a word completely should include various kinds of linguistic knowledge ranging from pronunciation, spelling, and morphology and to knowledge of the word's syntactic and semantic relationships with other words in the language, involving knowledge of antonym, synonymy, hyponym and collocational meanings .

The most complete descriptions of word knowledge were those suggested by Nation. Nation itemized eight different types of knowledge that are required to know a word, but later amended it, adding a ninth aspect 'word parts]. He explained the nine aspects of vocabulary knowledge as follows:

1. Knowledge of the spoken form of a word
2. Knowledge of the written form of a word
3. Knowledge of the parts in a word which have meaning
4. Knowledge of the link between a particular form and a meaning
5. Knowledge of the concepts a word may possess and the items it can refer to
6. Knowledge of the vocabulary that is associated with a word
7. Knowledge of a word's grammatical functions
8. Knowledge of a word's collocations
9. Knowledge of a word's register and frequency
