GDC Serilingampally Chemistry Classroom

Position on Periodic table

The diagram illustrates the periodic table with the following blocks and groups:

- s-block:** Groups 1A and 2A.
- p-block:** Groups 3A, 4A, 5A, 6A, 7A, and 8A.
- d-block (Transition elements):** Groups 3B, 4B, 5B, 6B, 7B, 8B, 1B, and 2B.
- f-block (Inner-transition elements):** Groups 4f and 5f.

Handwritten blue annotations include 'Ln' and 'An' with arrows pointing to the d and p blocks respectively.

Solid state chemistry online class Laws of Crystallography

Crystal Interfacial Angles

- Even when the crystals are different sizes, angles between equivalent faces are the same
- For different minerals, angles are different.
