Abstract

English is a global language which reins the world magically. It has become necessary to master this language to settle in this competitive world. But there are certain difficulties to learn this language for regional states in India. The present research paper throws light on the syllabus prescribed English text book for polytechnic students in the region of Telangana. This text book benefits technical students to enhance LSRW skills. It also provides an opportunity to assess themselves through different exciting activities along with each lesson in six units. The researcher also mentioned classroom experience with technical students and found out how these activities help them to extend their knowledge in English.

Key Words: Regional State, Polytechnic program, Second language, English Syllabus, Technical board and interested activities.
