Students also understand the making methods and processing steps of making bricks.

Department of Zoology

Field Trip to Jangedu Fresh water Pond

Date: 10-12-19

The Lake ecosystem is one of the sites for the conservation of biodiversity as different types of plants and consumers occupy different strata in the pond and live together by interacting with each other. The lake ecosystem also serves as a source of water for the species that do not live in the pond. Lake ecosystems contribute to the beauty of nature as they accommodate a variety of ornamental flowering plants. By visiting the pond ecosystem the students observed various plants and consumers living in the pond.

Field Trip to Kakatiya University is organised to stimulate interest and motivation in research, to add relevance to learning and interrelationships, to strengthen observation and perception skills, and to promote experiential learning in students. Students observed museum specimens, visited research laboratories and had an interaction with faculty. The students are oriented and they have the freedom to explore their own interests. Students learn to connect classroom concepts to field trip experiences.

Field Trip to Dairy Farm

Date:06-01-21

Field visit to Vijaya dairy farm: This field trip gave students the opportunity to get on the farm and put their book knowledge and learning into practice. Students were able to learn about the entire process of milk processing, pasteurization and preparation of dairy products like curd, butter, cheese etc., that are full of nutrition. Students were able to learn about the entire process from farm to store. Students also had the chance to interact with farmers, and witness how dairy farming impacts the local community and economy at large. It was a wonderful experience to the students .

Field Trip to Poultry Farm

Date: 19-01-21

Field Trip to Poultry farm :It has the brooder house, grower house & layer houses. About 3000 layers are reared in cage system. Owner of the poultry farm accompanied us and explained about the various routine activities and management practices carried out in poultry farm. First he took us to the brooder house where one day old chicks are brought and reared, after 35 days in the brooder house they are then shifted to grower shed which is present next to it, for three months. Then they are shifted to layer houses. Students observed routine activities carried out in poultry farm like cleaning, watering, feeding, collecting eggs etc.,

Field Trip to NIT

Date: 25-02-22

NIT Warangal is a premier Institute imparting technical education of a very high standard leading to the B. Tech degrees in various branches of engineering, M. Tech. and Ph. D programs in various specializations. Students went around the campus, visited laboratories, Library, observed techno exhibits, interacted with faculty and students and acquired lot of knowledge practically.
