6.5.1. Collaborative quality initiatives with other institution(s)/ membership of international networks

The issue of better quality in higher education has been a great concern as it is very obvious that the higher education could not keep required pace with the changes in technology, new trends of education system, occupational diversity, Global market trends and so on from time to time. In general, the graduates depend on the quality of education they pursue, for their carrier prospects. To ensure the degree of quality in education and to update the students with current trends, our institution in collaboration with NIT Warangal (one of the apex institutions of Engineering and Higher studies in Telangana) participated in webinars to upgrade our students with new trends in teaching learning, research and environment.
