Code of Ethics Policy

Introduction

The word 'ethics' has its origins in Greek language. It means way of living. A person's behaviour shall be governed by sound moral principles. The moral principles form a solid foundation for a person's life. So, there is a dire need to formulate code of ethics to all stakeholders of the college with emphasis on professional ethics. Against this background, the code of ethics was envisaged. We strongly believe that if the students imbibe morals and ethics, they become part of the solutions the college faces, not part of the problem. Since they are guided by moral radar, they will make the world a better place to live in. This shall guide the conduct of all stakeholders.
