“MS OFFICE”

NTR Govt. Degree College (W)

Department of Computer Science

Certificate Course on "MS-Office"

Summary of the Course:

Microsoft Office is a collection of office-related applications. Each application serves a unique purpose and offers a specific service to its users.

Microsoft Office is a bundle of different apps such as Word, Excel, PowerPoint, Access, etc. and more.

In an office or company environment, MS Office tends to be a standard, without which you won't get much done. Even if you are just a home user, it can be very useful for very basic things.

Word: Write letters without showing off poor spelling and worse handwriting. Microsoft Word is used to create documents.

Excel: Multiple purposes, including creating tables, doing quick calculations, etc. Microsoft Excel is used to manipulate, Organize and Store Data.

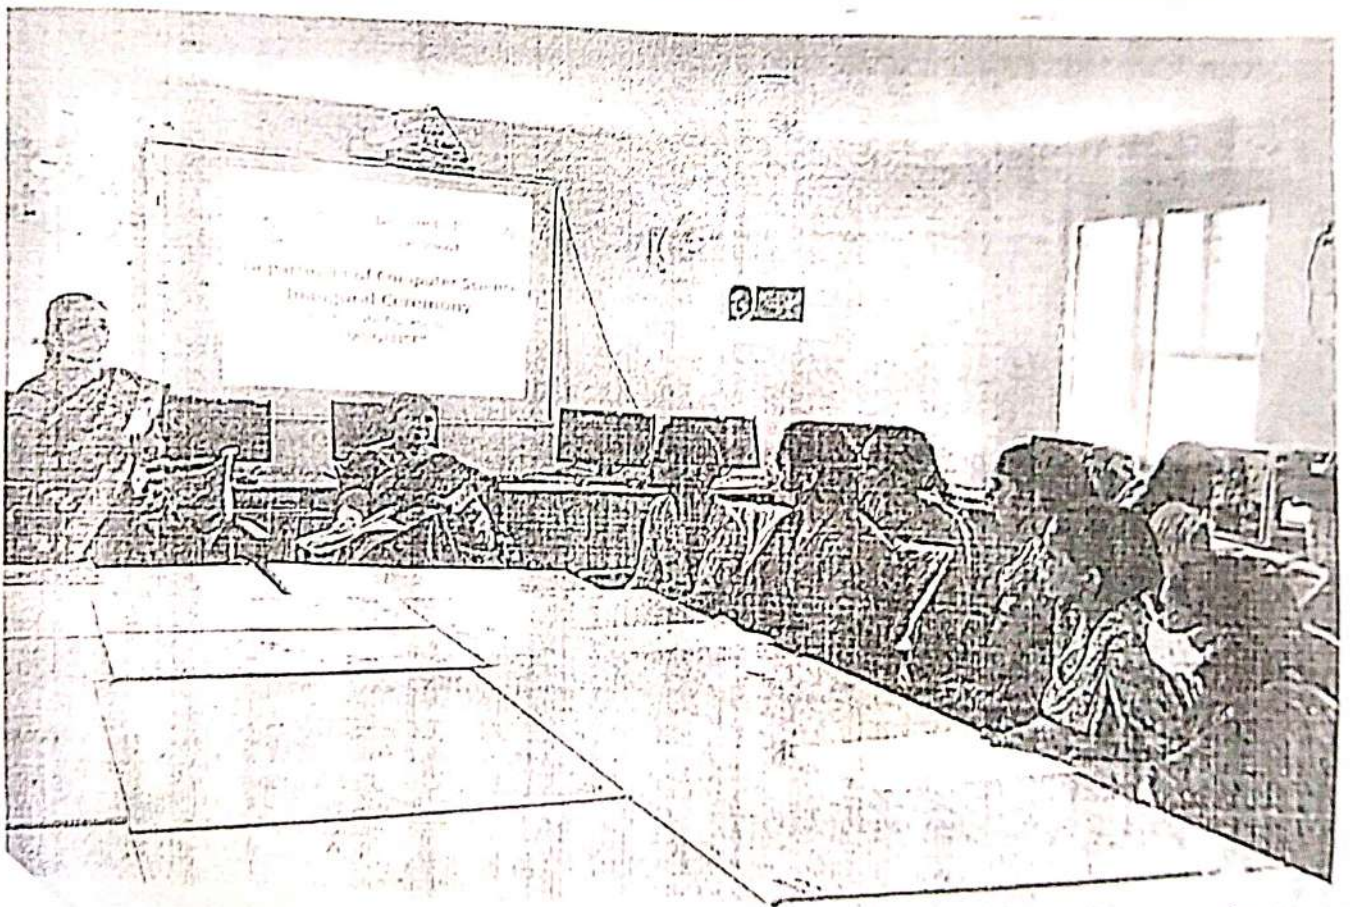

PowerPoint: Create an ad for the shop window. Create a "missing cat" poster. Microsoft PowerPoint is used to create presentations.

The main reason why MS Office (MS Word, MS Excel and MS PowerPoint) is popular is, it can be used by novice and does not need much training for simple modifications. Also, it works quicker than other apps.

You need a professional only if you need high end formatting of a document, while other applications like Adobe Indesign, you only need a professional even to do simple things.

Duration : 45 Days

Time : Daily, 1 Hr (2-00 PM to 3-00PM)
