# FIELD TRIP

A field trip has been arranged for B.com computer application students to visit Govt City College(A) HYD.

**OBJECTIVE:** To improve students' knowledge and to guide them for higher studies in different streams.

**CONCLUSION:** A wonderful experience to the students and faculty members visit at the Govt City Collage (A)Hyderabad. Met with senior faculties of different departments like, Commerce department, Computer Science department, TSKC, etc. Students have experienced with this opportunity.

Sub: Dept. of chemistry - field trip - request for permission - reg

Respected madam,

As mentioned in the subject cited above, we department of chemistry want to organize a field trip to R-O plant Narayanpet with B.Sc. Second year students (BZC). Students are very enthusiastic to come to this field trip. So, we request you madam kindly give us permission to organize this field trip.

Thanking you madam,

your obediently

(Md. Jani) - HOD

NOTICE

This notice is to inform all the students of our B.Tech  
B.Tech course that the department is going to organize  
a field visit to Kuvempu University, Narayanpet  
on 28-02-2021. This should be a great opportunity  
to come and give their names to the concerned  
in chemistry on or before 25-02-2021.

Department of Chemistry, Kuvempu University  
organized by

Dept. of Chemistry has organized a field visit to Kuvempu  
University on 28-02-2021. In this visit, a number of  
students participated in the field trip at the field plant  
Kuvempu Mangam gave explanation about the process of filtration  
of water to the students in detail. Students learnt more about  
the process by directly seeing the water plant operation. They  
cleared the doubts they have come across while explaining &  
noted down the procedure.

Mentor / Mentee Program

# FIELD SURVEY..

3

Objective: Conducted Survey at Govt City College on 14-03-22 on the topic of "resources utilized" by students to improve knowledge".

The best resources at college level like libraries, reading room, computer section, different projects, research papers uploaded by lecturers at City college, to improve and motivate students in future achievements in their career. Surveyed the students at diff sections and different courses along with their respective lecturers, how they are dealing with the resources.

Conclusion: Reproductive and Motivated Survey.

# FIELD TRIP

A field trip has been arranged for B& - *STATISTICS (1723)* students to visit Govt City College(A) HYD.

**OBJECTIVE:** To improve students' knowledge and to guide them for higher studies in different streams.

**CONCLUSION:** A wonderful experience to the students and faculty members visit at the Govt City Collage (A)Hyderabad. Met with senior faculties of different departments like, Commerce department, Computer Science department, TSKC, etc. Students have experienced with this opportunity.

Sub: Dept. of Botany - field trip - request for  
permission - regu.

Respected Madam,

As mentioned in the subject cited above we  
Department of Botany want to organize a field trip  
to visit Nursery for plant collection at Narayanpet  
with Bsc B.z.c II year students. Students are very much  
interested to come to this field trip. So, we request you  
madam, kindly give us permission to organize  
this field trip.

Thanking you madam.

Yours faithfully

**SCNM GOVERNMENT DEGREE COLLEGE**

**NARAYANPET, NARAYANPET (DIST)**

*This is to certify that is a bonafide record of  
Field trip done by the Department of Zoology,  
Government Degree College, Narayanpet,  
Narayanpet ( dist ) during the academic year  
2020-2021.*

**PRINCIPAL**

Under the guidance of

*1. Dr. Md. Riyaz Khan*

# PURPOSE AND IMPORTANCE OF FIELD TRIP

1. Observation is the basic pillar to develop scientific temper & knowledge.
2. The field trip gives the student an opportunity to practically observe the nature and understand the subject better than normal lectures.
3. Apart from understanding the subject field trips provides an opportunity to the students, to interact among themselves and with their lectures, which ultimately leads to the spread of knowledge.
4. Knowledge acquired through practical observation lasts longer than normal process of learning.

The department of Zoology organised the field trip on **9 February, 2021**, to study the pond ecosystem of Gollagudem pond, which is located 3 km away from the college campus.

The field trip was successfully organised under the leadership of Dr. Md. Riyaz Khan, lecturer in Zoology. The students of I & III & V Semesters actively participated in the field trip. The students showed great enthusiasm and actively participated in the field trip to Gollagudem pond.

" Pond Ecosystem " is a part of Ecology, in the syllabus of Bsc ( Bzc ) II year, Zoology, students of second year Bsc ( Bzc ), participated the field trip to have a practical, experience by watching, observing pond Ecosystem.

The Fresh water pond ecosystem have unique diversification of both phytoplankton and zooplankton. The growth of primary productivity is the availability of pond nutrients like nitrates, phosphates, oxygen, carbon dioxide and other micro and macro nutrients.

The biotic and a biotic factors are essential for life, light Temperature is one of the Major factors for the growth of phytoplankton primary productivity, it produces food through photosynthesis.

Students observed that same portions of the pond are overcrowded by floating hydrophytes like nymphaea and other plant and they noticed that this increase in organic mats may limit the availability of light and dissolved  $O_2$  in the pond.

The pond colour is mainly depending upon the growth of phytoplankton of the pond. This is mainly used by the zooplankton like copids, rotifers, mysis, snails, fish fingerlings and other big fishes.

These planktons are primary and secondary producer, here we can see the food web, food chain and energy flow. The hydrophytes play an important role for production of  $O_2$  and  $CO_2$  ratio in the pond Ecosystem. The hydrophytes consumed by herbivores animal like grass carp etc.

## *DECOMPOSERS*

Various types of bacteria and fungi act as decomposers they decompose the organic mats present in the pond. In this context student came to know the concept of Biological oxygen demand ( BOD ).

The students also observed the human activity across the pond. The human activity include washing clothes, animal grazing, fishing etc.

The students also came to know the threats of pond Ecosystem like overgrazing of animals, fishing, overcrowding of pond with hydrophytes like pistia, vallisnaria, nympia, chara etc..

Student keenly observed the tank, they enquired the quality of water with villagers and got some details of its usage as drinking water source for agriculture.

The villagers told the importance of the pond for their irrigation and drinking parps and use of the crops . This tank is also used for culturing some fishes like catla catla.

The student were calculated algal pista, wolfa, lemna etc., and water for observing protozoan like Euglena, paramecium etc., and for testing P<sup>H</sup> of water and salinity

## *CONCLUSION*

Finally, this field trip gave the chance to explore the vegetation of " Gulla gudem pond Ecosystems". The students with the help of the lectures studied several aspects of Ecosystem.

Apart from their academic studies, This fieldtrip created an excellent opportunity to interact among themselves & their lecturers, for the lecturers also it a fine occasion to know the behaviour and attitude of their students beyond the walls of the class room.

This held trip is successful one as the purpose of field trip met.

❖. FIELD TRIP TO "GULLA GUDDEM POND  
ECO SYSTEM"

➤ INTERACTION BETWEEN LECTURER AND  
STUDENTS

❖. FIELD TRIP TO "GULLA GUDEM  
POND ECOSYSTEM"

➤ STUDENT OBSERVING THE POND ECOSYSTEM

❖. OVER VIEW OF THE GULLA GUEM  
POND ECO SYSTEM
