1 . Title of the Practice

Best Practice - 1:

MID DAY MEALS

2. Objectives of the Practice

The specific objectives of the practice of Mid Day Meals are as follows:

- To reduce the absenteeism among the students of our college
- To make the students spend at college in prescribed hours taking up various curricular and co-curricular activities
- To make available nutritious food for the students of downtrodden

3. The Context

The Government Degree College, Thorrur is located in a rural area. Most of the students are socio-economically downtrodden and first-generation people pursuing Under Graduation. The majority of students are poor and coming to college from remote distant villages and the bus timings are not appropriate for them so they are unable to bring lunch. It causes students not to pay attention to the classes when they are hungry. Malnutrition is common among students due to their socioeconomic conditions. Especially, Females are anemic and weak due to a lack of a balanced diet. Some of them fainted due to not having meals. All these factors lead to absenteeism and break the continuity of learning. So it is decided to implement a mid-day meals programme for at least one to two months in the period of examinations.

4. The Practice

The institution has taken steps towards the implementation of Mid-Day Meals after thorough discussion and consultation with stakeholders. The management including the Principal and

staff has approached the local MLA and Hon'ble Minister Sri. Errabelli Dayakar Rao Garu brought the problem to his notice. He advised a charitable trust and pursued the issue. The Errabelli Charitable Trust, Thorrur has given consent to provide Mid-Day Meals to the students of Government Degree College, Thorrur. Smt. Errabelli Usha Dayakar Rao Garu, Chairman, Errabelli Charitable Trust, Thorrur visited the college and interacted with students and listened patiently to their problems and assured them of the implementation of Mid-Day Meals. The Mid Day Meals programme for students was started in 2018 and is still going on except during the Covid-19 pandemic period. The Charitable Trust personnel come to the college with vessels, rice, vegetables and other required equipment and prepare meals. The cooking is done in good and hygienic premises and the cooks also take care and cook the mid-day meal in hygienic practices. College NSS Volunteers help in the preparation of mid-day meals. The Disciplinary Committee of the college would supervise the dining time. Students also actively participate whenever their services are needed. The Mid Day Meals programme is offered from February to April months every year at the time of examinations. About 250 students are getting benefits every year. As Mid-Day Meals are provided at the time of examinations, students prepare well for examinations without hunger.

The Mid-day meal system is already prevalent in primary education systems throughout the country but it is unique in the context of the Higher Education System. It certainly helps the rural students whose socio-economic backdrop is poor. It is useful to improve the regular attendance of students at the institution, pay attention to the learning process and curb malnutrition among the students, especially rural girls.

Though the mid-day meals programme is good and useful, there are some constraints in its implementation. It is expensive to implement throughout the year. The number of students present varies day by day so there would be ambiguity regarding the quantity of meal preparation. It is hard to stick to the time for a one-hour lunch to complete.

5. Evidence of Success

The implementation of the Mid-Day Meal programme in the institution is successful in achieving its objectives. The programme was implemented for two to three months only at the time of examinations. It attracted the students to the institution and reduced absenteeism. There is a drastic increase in the daily attendance percentage from 26% to 54% in the period of implementation of the Mid-Day Meal. As the programme is being successfully

implemented, the news regarding it spread in the locality through the media, and other local sponsors and philanthropists also came forward to extend their hand in addition to Errabelli Charitable Trust, Thorrur. Students felt very happy for providing delicious food and attending college eagerly and regularly which improves their attention on learning without hunger. The students prepare well and peacefully for examinations and attempt them perfectly. So the institution pass percentage also increased significantly to 100%. The most important achievement is curbing somewhat the malnutrition among the students, especially in girls, that the number of faint cases in them reduced from 4 to 5 per month in the non-implementing period to zero in the Mid-Day Meal implementing period.

6. Problems Encountered and Resources Required

The Mid Day Meal Programme implementation has encountered some problems. Daily supervision is needed for the entire process of the Mid-Day Meal Programme implementation period. The Principal and staff have to monitor every day and make sure to maintain discipline among the students to not become crowded. It is too hard to complete the lunch programme within one hour prescribed. It would be an interruption for academic weather if it takes more than one hour. To continue the Mid-Day Programme throughout the year, a huge amount (10 Lakhs) of expenditure is needed. The sponsors are not always ready to bear such an amount every year. So there is a need to search for new sponsors every year to implement the programme. This became a herculean task for the management to find sponsors and grab the funds to implement the programme. A permanent setup for the kitchen or to keep the storeroom is also needed. After trying to implement the Mid-Day Meal Programme besides many hurdles, it was not possible to get 80% or 90 % attendance among the students.

7. Notes (Optional)

The Mid Day Meal Programme is certainly useful to all Higher Educational Institutions. By implementing it, the HEIs can attract enrollment, student's regular attendance, increase in pass percentage and be helpful to the rural and socio-economic backward students. The dropout problem also can be curbed with the Mid Day Meal programme. It would be better if the government implemented the programme in all the higher educational institutions by bearing the expenditure. Otherwise, the Higher Educational Institutions have to establish a corpus fund specifically for the programme. Another way for gathering the funds for this programme is Corporate Social Responsibility. The Public or Private Corporate companies have to allot funds under CSR to implement the Mid Day Meal in Higher Educational Institutions. The harmonious weather in the institution and all round development in the students will be possible by this programme.

2018-19

MID-DAY MEAL PROGRAMME

As part of the best practices followed by Government Degree college, Thosur the mid-day meals scheme for all students is continued this year also with the help of Ennabelli Dayakar Rao Charitable Trust.

BEST PRACTICE - 2

Introduction

The Government Degree College, Thorrur has conducted an innovative programme on Enhancing Employable Skills for Passing-out Graduates and Students to make them face interviews to get opportunities in different sectors in this competitive world.

1. Title of the Practice

ENHANCING EMPLOYABLE SKILLS FOR PASSING OUT GRADUATES

2. Objectives of the Practice

The specific objectives of the program are as follows:

- To make the students to face interviews easily and get jobs in the present competitive world.
- To focus on important behavioral skills needed for interviews.
- To aware the students of interview process by conducting mock interviews.

3. The Context

Generally the employers or institutions conduct interviews to recruit the required personnel. Interview is the main important threshold for job seekers to get through. An interview gives an intuition into the candidate's rational knowledge and creativity they possess. The interview not only assesses a candidate's skills but also checks their suitability for the job. The interview helps to obtain additional information about the skills and knowledge of the interviewee.

The students of Government Degree College, Thorrur are of rural background and downtrodden sections and most of them are first generation for higher studies and jobs. These are mainly Telugu medium students and have less exposure to the sophisticated interview skills. It is come to the notice of the institution that many pass outs are facing trouble to get through interviews and get jobs due to lack of communication and employable skills. So that it is decided to conduct a programme to enhance the employable skills including interview for the passing out graduates of institution to enable them to fit for jobs according to the needs of industry and society.

4. The Practice

The Government Degree College, Thorrur has taken numerous activities to improve the employable skills among the passing out graduates of the institution. A Series of Lectures are conducted on employable skills. Our institution staff and outside experts are invited to take classes to students. A special focus is put on the interview skills. In this programme, it is covered the life cycle of an interview from the beginning to the end while explaining pre and post interview activities and processes. Through this programme, a student will learn the necessary preparation before attending the interview. This programme deals with different types of interview questions, interview mentality purpose, and the effects of students' behaviors and body language during the interview. This programme includes the skills essential interview skills such as communication skills effective listening skills and how to handle salary questions responding to common interview questions and other behavioral skills.

Mock interviews are conducted for students inviting experts. With the help of these mock interviews students will know how to greet, how to present themselves, how to make use of the best of words, and how to deal with different types of questions.

Students are advised to rehearse for an interview at home by themselves or with a friend or family member. The simple ways such as using flashcards, dressing in interview clothes to practice and record interviewing, and then playing it back to see how students did are some activities conducted and made students to practice.

And, reviewing interview questions for a variety of different occupations, types of jobs, and types of interviews conducted in the institution is more useful to passing out students. So that they can use the best interview answers to get ideas for interview responses.

5. Evidence of Success

By this programme, 17 members benefited for the academic year 2018-19, 15 members in 2019-20, 21 members in 2020-21 and 15 members in 2021-22.

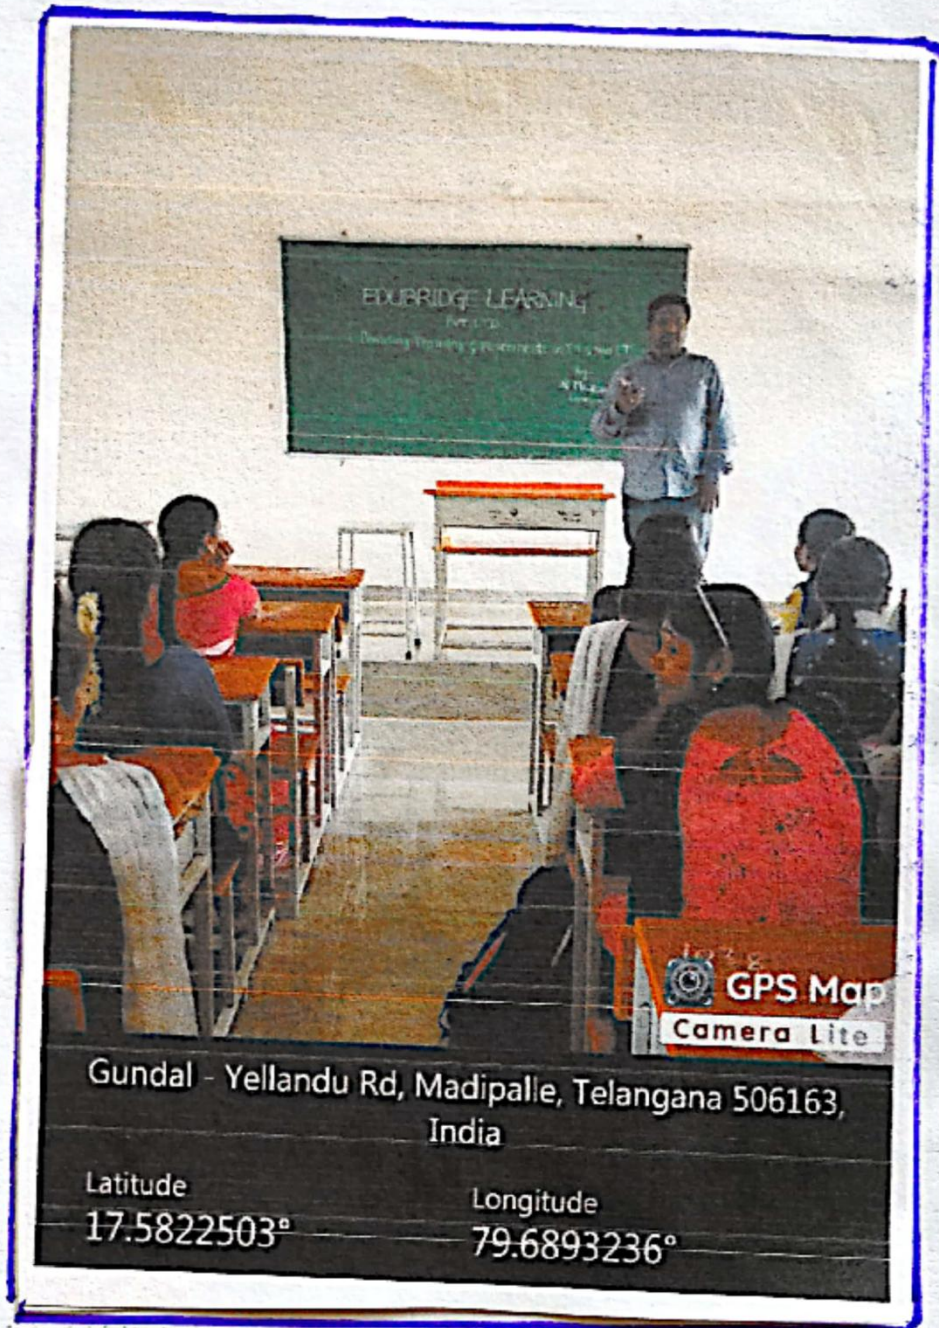

6. Problems Encountered and Resources Required

There are some problems while conducting the programme of employable skills classes. Because most of the students are from rural backgrounds, they did not have any basic communication skills in English. Students are depending and participating in agricultural works so that they are paying less attention in improving the job oriented skills. The students are unable to buy basic communication skills books due to their poverty.

7. Notes (Optional)

The Government Degree College, Thorrur is constantly trying to conduct interview skills for unemployed youth. We are planning to conduct spoken English classes under TSKC for the outgoing batches of students.

BEST PRACTICES

The institution intended to inculcate best practices in many ways. Some of the following Departments of College have been implementing various Best Practices as follows.

Sl.No.	Department	Name of the Best Practice
1	Zoology	Student Health Profile & Blood Grouping
2	Zoology	Save Birds
3	Zoology	Best out of Waste
4	Botany	Know a Plant a Day
5	Botany	QR coding to Plants
6	Commerce	Help Desk at Bank
7	Mathematics	Maths Friend
8	Staff Club	Financial Help to Poor Students

GOVERNMENT DEGREE COLLEGE, THORRUR,
MAHABUBABAD DIST.

DEPARTMENT OF ZOOLOGY
Best Practice

Student Health Profile

Objective:

To maintain the health profile of the student and suggest required remedies.

Context:

The students of the college mostly hail from economically backward sections. Most of them are physically weak, and are malnourished or undernourished. There were instances where some students suffered from ailments and the staff were in a state of confusion. To treat the students at the right time, it is thought to prepare a detailed health profile of the student in the college to aid them in an emergency situation.

Practice:

The Department of Zoology has started maintaining the health profile of all students in the College since 2018-19. Along with their preliminary information, health related details are also taken and preserved for the future need. Some suggestions are given to the students like the diet to be taken to improve their health.

Success:

The practice of maintaining the health profile has been started in the year 2018-19. As we have earlier entered the details of health issues, we could easily help the students when certain health problems have been encountered during college hours. The details listed like Blood group will also be useful to help the needy people in emergency situations.

Best Practice

Save Birds

Objective:

To save birds by building nests, arranging bird feeders, and water containers.

Context:

The bird population is declining due to various reasons. The most prominent reasons are loss and degradation of their natural habitat and direct overexploitation of many species. Birds are very essential in the ecosystem as they play a major role as predators, pollinators, scavengers, seed dispersers, and ecosystem engineers. Hence the conservation of birds is important and the population of birds has to be increased.

Practice:

In order to save birds, the Department of Zoology is arranging bird nests, bird feeders and water containers. The bird nests made up of different materials like waste boxes and balloons have been arranged in the College.

Success:

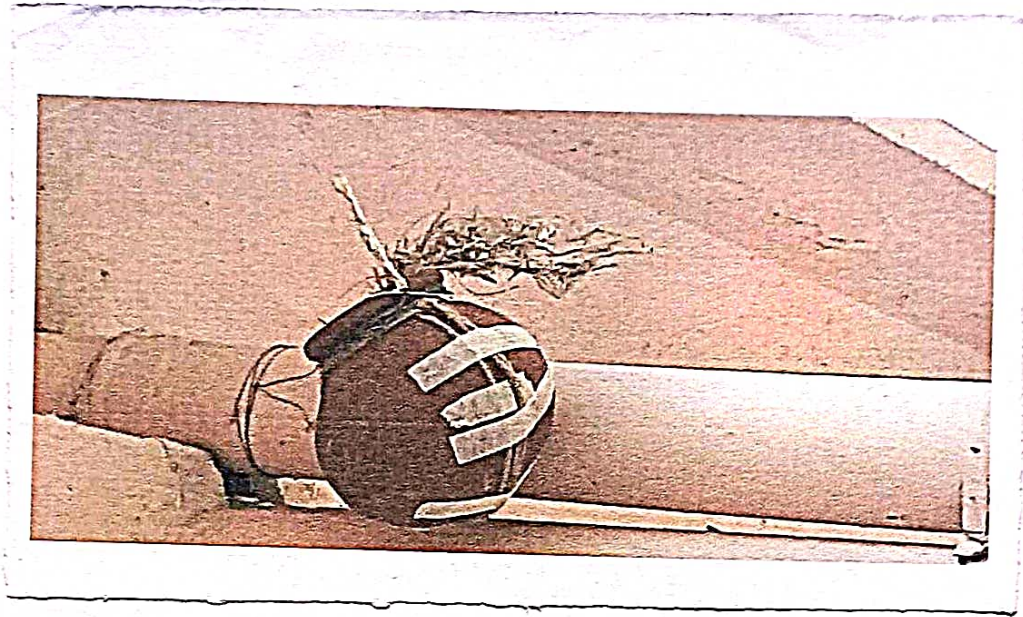

The birds have built their nests in the arranged nest boxes. We are happy to say that the aim of arrangement of nest boxes has been fulfilled. Birds have built nests in the nest boxes arranged.

DEPARTMENT OF ZOOLOGY

BEST PRACTICE

Best out of Waste

Objective: To reuse the plastic waste material and make the best out of it.

Context: Plastic waste adversely affects the environment. Plastic waste toxifies the land due to chemical degradation of its organic material. Microplastics in plastic waste easily find their way into the environment. Many health problems are connected with the toxins released from these microplastics. With the reuse of plastic, we can reduce the footprint of plastic on the dump sites, greenhouse gas emissions can be minimized and resources can be conserved. Hence it is thought to reuse plastic waste and make useful things. New items can be made from waste for those who cannot afford to buy new things.

Practice:

The Department of Zoology has made the students learn the preparation of new useful things from the plastic waste. For instance, the broken mug with the use of newspapers, plaster of Paris, tissue paper, glue, silver foil and colors was made into a pen stand.

The Department of Zoology has made the students learn the preparation of new things from the plastic waste. The waste box with the sheets of papers, tissue paper, paper tape, glue, and colors was made into a Nest box. The nest box was also made with the use of paper, plaster of paris and glue.

FINANCIAL HELP TO POOR STUDENTS

As the students are rural and down trodden, backdrop the Govt. Degree College, Thozhur has decided to help poor students financially every academic year.

All the staff members have volun came forward to pay DOST Registration Fee, Admission Fee and distribution of books, Study material, medical aid etc; For poor and needy students.

Objectives :-

1. To help the poor students who are not able to pay fee for DOST Registration and admission.

2. To provide study material and books to economically backward students.
3. To provide medical aid to needy students.

Context :-

Most of the students of GDC Thosru are poor and economically backward. Their parents are daily labourers and agricultural labourers, so that the students cannot afford much money on admission fee and study material. Due to poverty some of the students' health conditions are anemic, deficiency of vitamins are found.

The staff of GDC Thosru moved about the conditions of students and came forward to extend their help financially and empathetically to the

Students who are in need.

DOST Registration Fee is paid for some of the students every year.

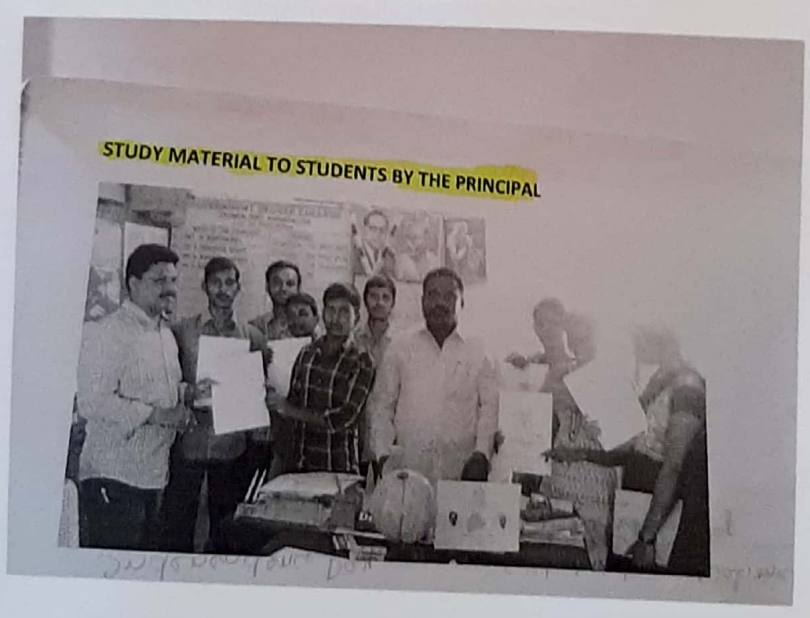

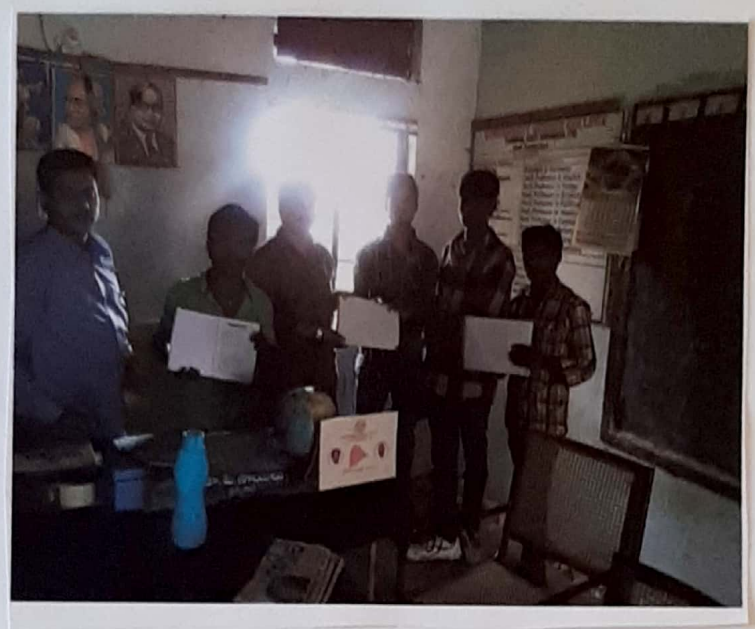

Study material and books in relevant subjects are distributed to some of the poor students.

Iron tablets, multi vitamin tablets medical first aid kits are also given to the needy students after finding out them carefully by health club of college.
