POLICY OF CLEAN AND GREEN CAMPUS INITIATIVES

The College acknowledges the significance of preserving the natural environment within the built environment and considers it an essential component of good institutional practices. To achieve this, the college will establish, execute, and maintain an Environmental Management System, which will promote sustainable development and have positive effects on human health and the natural environment for the college community and its surroundings.

As part of this commitment, the College will:

1. Implement the best environmental practices feasible for its waste management services and ecological initiatives.
2. Use a "waste hierarchical approach" to manage waste responsibly, minimize landfill, and maximize reuse and recycling opportunities.
3. Promote water conservation and energy efficiency through efficient programs and practices, and strive to minimize environmental footprints associated with college activities by employing cleaner and eco-friendly practices/technologies.
4. Comply with relevant environmental laws and regulations established by the government.
5. Periodically review environmental objectives and targets to reduce resource consumption and enhance environmental performance.
6. Communicate this policy to all stakeholders.
7. Ensure that all employees, students, or others utilizing the premises comply with the environmental objectives set forth in this policy and the associated Environmental Management System, in line with all applicable environmental regulations.
