INDIRA PRIYADARSHINI GOVT. DEGREE COLLEGE FOR WOMEN

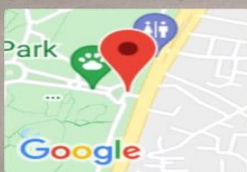

Nampally, Hyderabad - (NAAC 'A' Grade)

Today, zoos are meant to entertain and educate the public but have a strong emphasis on scientific research and species conservation. There is a trend toward giving animals more space and recreating natural habitats. Zoos are usually regulated and inspected by the government.

A field trip to the zoo provides students with the opportunity to see different animals in their natural environment. This also helps the students understand that animals are living beings and they also have certain needs to survive. This understanding leads students to develop compassion and empathy for them.

The primary aim of a field visit is to gather geographical details. Reinforcing experiential and relational learning is the key goal of conducting a field trip for students. Field trips are a way of improving learning in the classroom by creating links to the real world.

... students are with LEOPARD cage in Zoopark...

So , as per the syllabus of the practicals of OU , all life science students were taken to zoo park for field visit . Almost 145 students were attended for the trip. They have noticed all the endangered species and noted the key points of habits and habitats, after that they have prepared the animal album on endangered species .

According to the Association of Zoos and Aquariums, zoos and aquariums have over 181 million visitors each year. We have already shared the many benefits of visiting an aquarium, so now it's time to take a closer look at zoos. Visiting a zoo offers so many incredible learning opportunities. While having a fun day exploring, students will develop valuable skills and obtain priceless knowledge. A day at the zoo also encourages a healthy lifestyle while bringing family and friends together. It is the perfect day trip destination for any season. There are so many amazing benefits to visiting a zoo that it was difficult to narrow the list down. After careful consideration, observation and research, here is what our students came up with:

As students walk around the zoo, they are exposed to words and concepts. It also encourages dialogue between the concerned lecturer and students. While walking around, it is important to label every animal and ask questions. This will help increase their vocabulary and comprehension skills.

Many zoos offered exciting and educational activities and special events. For example, [Turtle Back Zoo](#) and [Cape May County Zoo](#) both offer night-time programs where students got a first hand look at how animals behaves and interact at night. Other events may include conservation days and days dedicated to specific animals.

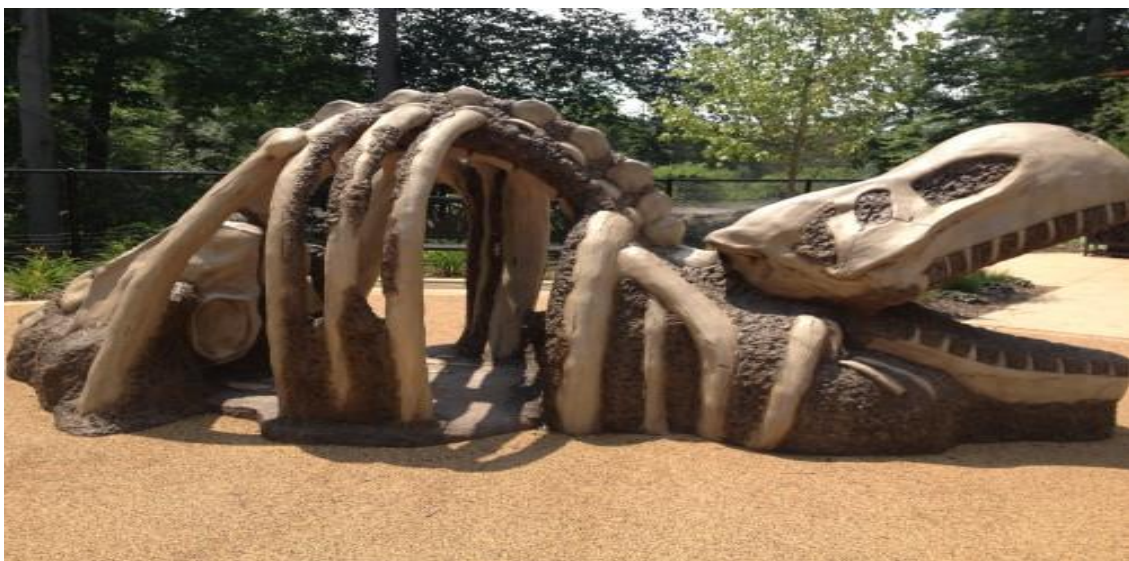

Visiting a zoo helps students understand the importance of taking care of the environment as it has a significant impact on the lives and welfare of animals. Zoos also teach families about the importance of conservation and animal care. students can especially learn about the impact humans have on animals, Students can learn the unique story about each animal as they walk around the zoo.

After visiting the zoo park ,students got an aware of animals behavior, care and conservation. These field trip has offered a structured, fun and hands-on learning environment for all the students. They often include stories, songs, and other activities. These multi-sensory based learning programs are perfect for instilling knowledge about animals.

The Zoo park cover a vast amount of land which allows for ample exercise. It also provide playground areas for children to work those gross motor skills while making new friends.

Even, if students from life sciences don't attend the educational programs, activities or special events, students will still absorb an insane amount of knowledge when visiting a zoo. They will use all of their senses to take in their surroundings and expand their understanding about animals and their environment. They will learn the way an animal smells, the sounds he makes, the way he feels and what he looks like. Zoos offer a true multi-sensory approach to learning!

Zoopark...

' Nehru zoological park located in Hyderabad , is a place for all the 'lovers of animals and place to see the nature and wild life. It has rare species of animals and birds , most of them with houses on conditions resembling their natural habitats as much as possible. This holds the distinction as a first zoo to create moated enclosures for various animals '
