

INTRODUCING CLINICAL PATHOLOGY TESTS TO BZC STUDENTS AS A BRIDGE BETWEEN

PRE-CLINICAL AND CLINICAL MEDICAL SCIENCES

Many of the graduates are not able to correlate the clinico-Pathological aspects of various diseases as a result the rational use of investigations for diagnosing various diseases compromised.

Department of Zoology, Government Degree College, Wardhannapet has conducted Blood Grouping test to all the students & staff.

Students gained the knowledge on the following tests and created awareness on Diseases

① Blood Grouping test :- No. of Tests - ②③
Done by students

Students were taught and trained on testing a blood sample and in finding the blood group.

In training, students have collected the blood samples and identified their blood groups successfully and accurately.

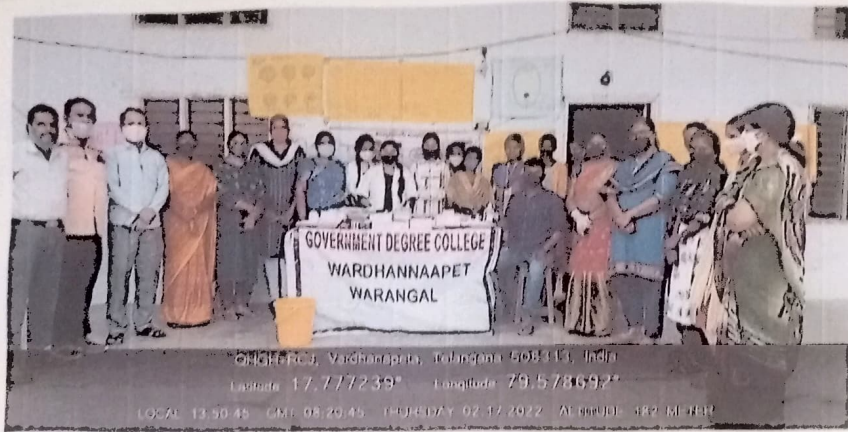

② Haemoglobin Percentage No. of Tests - ①①
Done by students

SAHLI's method used for the estimation of Haemoglobin. Students were trained on Haemoglobin estimation. In training students have collected the Blood samples of students & staff in the college, estimated Haemoglobin percentage successfully

23 Blood group tests & 11 Hb estimation tests were done by B.Sc, BZC students.

Started doing all the clinical Pathology tests with the students in GDC, wardhannapet, warangal.

Blood group test & Haemoglobin tests conducted to staff by students

Blood group test & Haemoglobin tests conducted to staff by students, GDC, wardhannapet, wgl

Awareness on Blood diseases :

In training students in our college has collected the blood samples & tested Haemoglobin percentage.

They were identified so many students were Anaemic & Not sufficient Haemoglobin. Hence they need awareness on Blood diseases. Like

Anaemia

Leukamia

Erythrocytosis

Leucocytosis

Sickle cell Anaemia

Thalassemia

RBC & WBC counting method :

Students gained the knowledge on RBC counting method and WBC counting method with the help of Zoology Laboratory equipment in the college.

Parasites in Human Body :-

Students were taught and trained on signs and symptoms of intestinal Parasites can live in the intestines for years without causing symptoms.

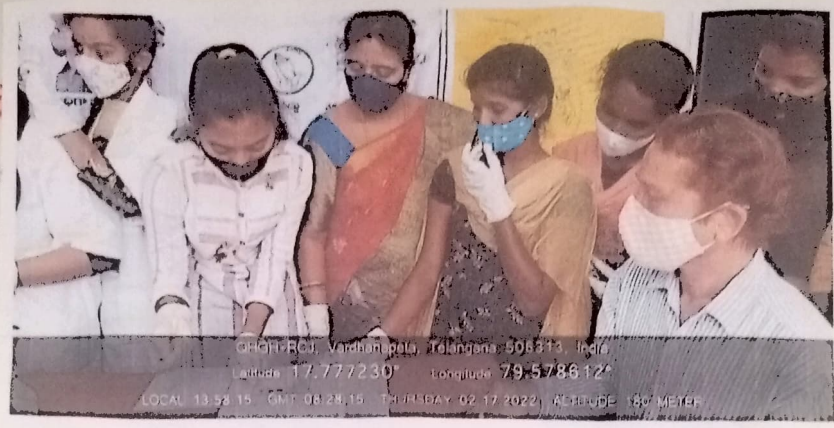

Awareness on General Medicine :

Government Hospital, Wardhannapet, Chief Superintendent has provided general medicine to our college.

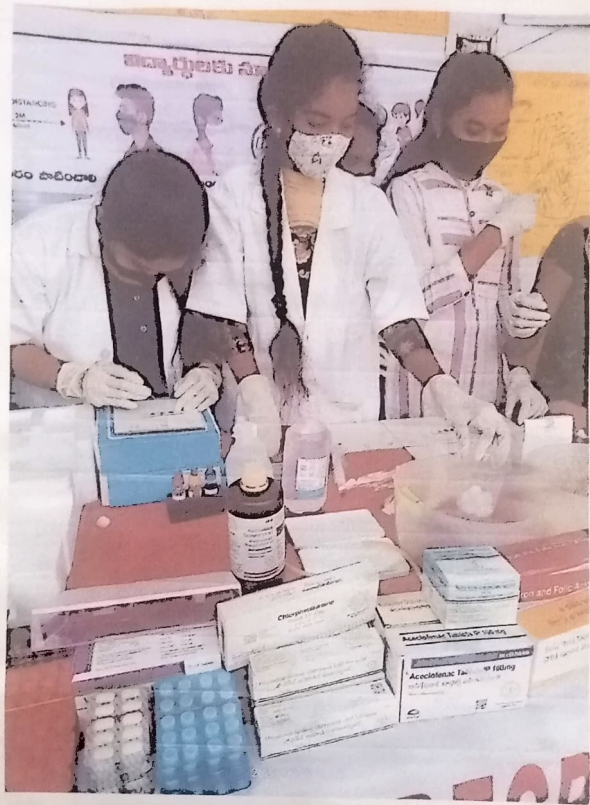

Dept. of Zoology & some trained students have mentored Health care in our college.

Giving training to students by Dr. K. SANDHYA.

Exhibition on General Medicine

Received General Medicine from Govt. Hospital, Wardhannapur, warangal.

Awareness on Blood diseases :

In training students in our college has collected the blood samples & tested Haemoglobin percentage.

They were identified so many students were Anaemic & Not sufficient Haemoglobin. Hence they need awareness on Blood diseases. Like

Anaemia

Leukemia

Erythrocytosis

Leucocytosis

Sickle cell Anaemia

Thalassemia

RBC & WBC counting method :

Students gained the knowledge on RBC counting method and WBC counting method with the help of Zoology Laboratory equipment in the college.

Parasites in Human Body :-

Students were taught and trained on signs and symptoms of intestinal Parasites can live in the intestines for years without causing symptoms.

Awareness on General Medicine :

Government Hospital, Wardhannapet, Chief Superintendent has provided general medicine to our college.

Dept. of Zoology & some trained students have maintained Health care in our college.
