

# Awareness on Accounting Management through CAIMS

To Ensure Enough, high quality bench marking of globally acceptable qualification standards.  
To train the students to understand with Experiential learning and Practical Approach.

As an Accounting graduate, the theory makes you knowledgeable but unless you know how to implement the knowledge in a true working Environment, you are not ready to become a successful accountant.

one of the best ways to stand out from the crowd and show you have proper dedication in the accounting field is to gain practical accounting training.

Hands on knowledge of popular accounting software Accounting training program helps to apply the theory in real-life scenario. It acts as a bridge between theoretical & practical knowledge.

Practical Accounting Training helps students gain information & exposure to real life scenario which is not enough from a university level Education. Accounting training helps to sharpen your accounting skills and makes you more familiar with the accounting Industry.

The Main objective of an Accounting information system, a pre-eminently user oriented system.

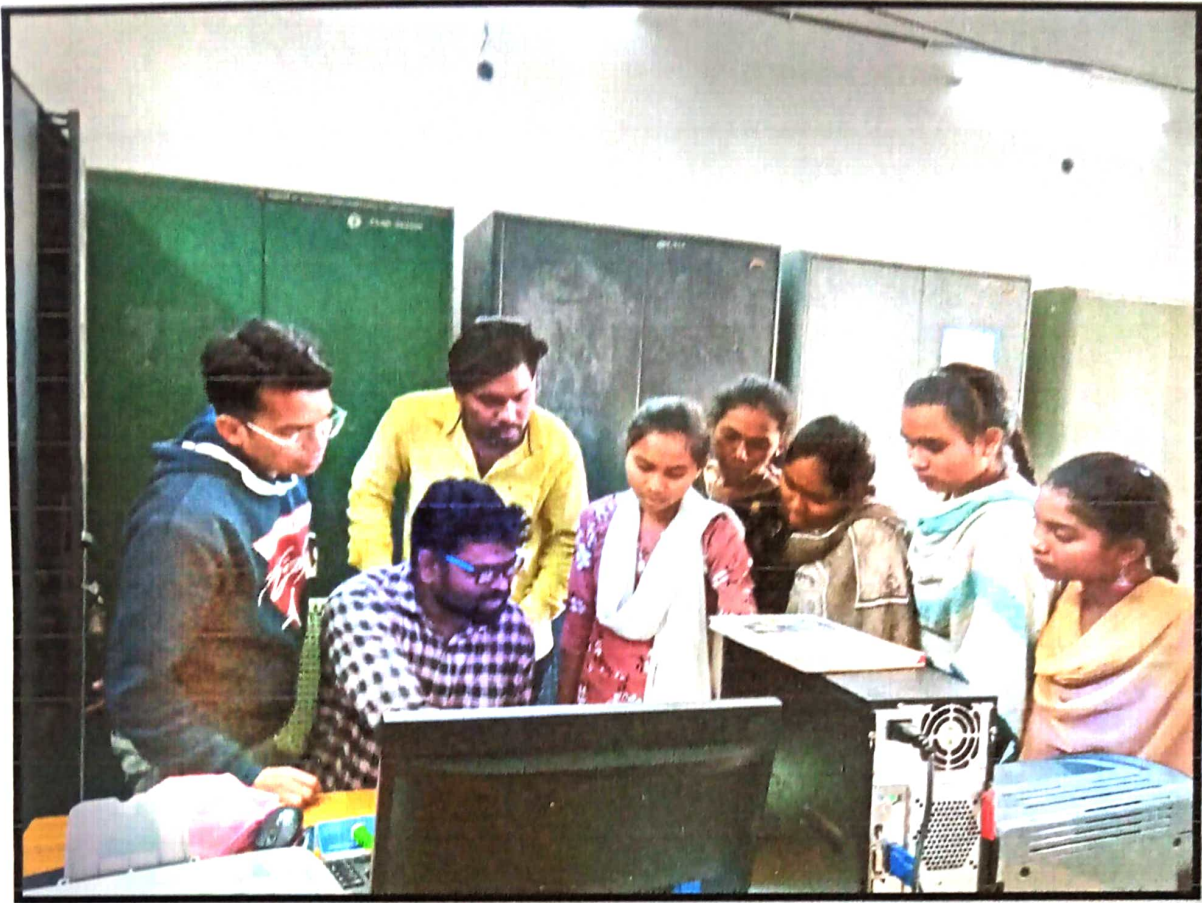

It is the collection and recording of data and information regarding events that have an economic impact upon organizations and the maintenance, processing and communication of information to internal and external stakeholders.

For Experiential learning in Accounts,

Practical Accounting Training will help the students to gain practical knowledge & exposure. Based upon this we the Commerce department started to train the students in Account Management system at college through "CAIMS" "College Information Management system."
