Syllabus should be advance based on day-to-day technology.

No...all is good

Totally changed the education system..

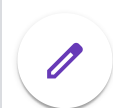

Sufficient time should be given to the lectures so that they can cover the concepts instead of teaching question to answer.

According to my intellectual: Concept learning will improve the students ability in subject . Q&A method will distroy the students thinking & understanding power .

I think you all got my point.

Hope some improvement in teaching style from this survey.

Syllabus must be completed before exams

Number of periods should be increase ,according to topic of the syllabus

Classrooms infrastructure should be developed a lot more . The cameras and fans aren't even working in most of the classrooms . Last time when I came for exam i couldn't breathe properly because of the fan not working in the classroom . Please check these things before allotting the room numbers during exams and also for normal day classes .

College campus should be change

Improve the pg block building

Young talent lecturers are wanted clg students

Infrastructure is very very very bad

I think it's better to put some extra curricular activities in the college,so that every student gets interest and they will attend the college regularly.And mainly the maintainance of the classroom,we don't even have a proper fans and switch boards which don't work properly

Should must change teachers thoughts

The relationship between teacher and students must be friendly like Guru Dronacharya, then our society will change and every student becomes like great person's, Change the history.
