

Equations

- ▶ Differential equation was part of calculus, which itself was independently invented by,
- ▶ English physicist Isaac Newton and
- ▶ German mathematician Gottfried Leibniz. \hookrightarrow

The intersection of the sphere curve lying in a plane which circle with radius r .

USE OF TECHNOLOGY

11

- ① As the college has facilities like digital boards with internet facility since 2017 we regularly use them to create interest and to improve quality of class.
- ② whatsapp groups for each class are created separately to create a room for interaction related to the subject even after the college hours.
3. Covid pandemic has necessitated the use of ICT based learning method full fledgedly through meeting apps zoom, google meet, webex etc. Google class room is used to give assignments, conduct tests, sometimes seminars were also conducted through online mode.
4. classes are taken with Power Points Presentations regularly.

Advantages:-

1. Different modes of learning creates enthusiasm.
2. Saves time.
3. Improves students attendance.
4. e-content is shared via whatsapp groups.
5. Many reference books which are otherwise unavailable and costly are shared to the students as PDFs. which improves their subject knowledge.
