

Water Management

*Basic usage of water in campus are; Drinking, Gardening, labs& Toilets, and Cleaning the campus and surroundings and consumption of water is 2000-3000 liters per day

* Apart from the rain water, the main source of water in the college is borewell and mission bhairatha Water connection.

*Overhead water tank installed for storage of water. The overflow of tans are directed towards the harvesting pits and there are two overhead tanks, each tank contains 1000 lits

Few ways to reduce the amount of water used

*Turn off the water immediately after us

*Instead of water pipes drip system can be used

*Efficient taps, Pressure reducing valves, insulated pipes, Efficient toilets, Recycling system, Rain water harvesting and Water meters.

*There are 4 rain water harvesting pits are there to save water and there is a plan to install modern rain water harvesting system in future.
