Career Options in Economics

As you already know, economics is an enormous field with a wide scope of growth. Here are a few **career options in economics** which you can explore.

Economist

Average Salary Range: 1.88 Lakhs – 14.80 Lakhs Per annum

If research and analysis is your cup of tea, then you are meant to be an economist. With a credible background of economics and a keen interest in the economic functioning of the market in general, you will be able to understand the producer behaviour and consumer behaviour very effectively.

Focusing on topics like energy cost, inflation, and interest rates, you will enjoy making economic predictions, designing policies, and advising your clientele through various reports and presentations.

Adam Smith, Karl Marx, M.G Ranade, Amartya Sen, Manmohan Singh, and many others are few of the most popular economists known to the history of humankind, and your name has the absolute potential to be added to the list.

With the professional and educational background in economics, the career path of an economist is not only the safest bet but also your best one.

Personal Financial Advisor

Average Salary Range: 1.84 Lakhs – 10.00 Lakhs Per annum

A financial advisor is a personal financial planner whose primary job is to plan investments and manage money in a way that generates the best return for the principal. It is essentially a number game and would be challenging as well as rewarding for those who like the number games and have a keen interest in economics and finance.

The advisory role essentially involves budgeting, investment, and tax-saving strategies for the clients regularly and to change the strategy by evaluating the market conditions. This role also involves being an educator in respect of managing money to every client who would depend solely on your skills and expertise for making their personal financial decisions.

Often people think that the role of a financial advisor is all about managing your stock portfolio and executing trades. The actual purview of a financial planner spans beyond the investments and covers every aspect of personal finance right from earnings to investment and also the insurance and tax saving tools to employ.

Economics Teacher

Average Salary Range: 2.06 Lakhs – 10.00 Lakhs Per annum

The profession of a teacher requires no introduction and is considered to be one of the noblest professions in any part of the world. The branch of economics is so huge that everything has some element of economics in it. The areas of study of economics can be divided into two, i.e. teaching and research. The teaching starts right from high schools to colleges and the research part is more of an advanced level of learning where experienced professors of esteemed colleges and universities guide the students and research fellows to study various economics' concepts and methods and its applications.

The young aspiring students who look to advanced research concepts with a passion for teaching can become economics faculties in good colleges in the country after passing the necessary qualifying examinations. If this sounds like your area, you can take additional courses to understand the intricacies. Online platforms like upGrad offer great certificate courses that cater to your needs with the help of industry experts.

Supply Chain Analyst

Average Salary Range: 2.49 Lakhs – 10.00 Lakhs Per annum

A supply chain analyst is a key person in the whole workflow of the supply chain who collects and analyses data to improve the performance and to scale down the costs. The role of a supply chain analyst requires strong analytical skills and business acumen. The complex job profile requires good problem-solving skills and attention to every minute detail.

The vital job responsibilities of an analyst include the planning and implementation of supply chain optimisation projects, maintaining standards, and overseeing inventory procedures.

Being the contact point for purchases as well as inventory management, the job of a supply chain analyst demands excellent communication skills and outstanding organizational ability, and a problem-solving attitude.

The sharp analytical skills and good command on the numbers will help a person to become an analyst. A person with a sound knowledge of economics and understanding the number of the game well with sharp problem-solving skills can land in the job of a supply chain analyst with great success.

Business Reporter

Average Salary Range: 1.01 Lakhs – 10.00 Lakhs Per annum

Are you a media enthusiast? Are you someone who would like to take a deep dive into business stories? Do you like economics? If the answers to all these questions are affirmative, then you can land into a successful career as a Business Reporter.
