

TOPIC: PHENYLE

3

INTRODUCTION

Phenyl is an emulsion of light creosote oil and water with soap. Creosote oil contains carbolic acid, creasol and other homologues of phenol which exert the necessary germicidal power. Adequate incorporation of creosote oil or further addition of phenol or cresylic acid or other antiseptic chemicals is essential to conform to the carbolic coefficient required for the product. Apart from possessing the correct germicidal strength, phenyl should stand without separation for any length, whether exposed or not. When poured into water it should readily disperse without stirring. It should form a thick, milky white emulsion when sufficiently diluted. This is how an ordinary buyer would generally judge the quality of this disinfectant.

phenyl apart from its use in household, hotels, and restaurants, kitchens, bathrooms, and drain lines is used in considerable quantities by institutions such as hospitals, nursing homes, dispensaries and municipalities.

GOVERNMENT DEGREE COLLEGE - KOLLAPUR - NAGARKURNOOL (DIST)

From 21-03-2022 to 05-04-2022. 2 hours per day.

GOVT. DEGREE COLLEGE - 3017

(Affiliated to Palamuru University) Certificate format.

KOLLAPUR - 509102

Accredited by NAAC with "C" Grade

ISO 9001-2015

CERTIFICATE OF COURSE COMPLETION

This is to certify that Mr / Miss

No / do..... Hall ticket No.....

of Participated in..... Preparation of Phenyf.....

a certificate course organized by the Department of Chemistry.....

from..... 21-05-2022 to 05-04-2022 and he / she successfully completed.
