

Water Distribution Facilities in the College

College has two bore wells to cater the needs of the Institution.

Borewell in the Campus, catering the needs of drinking, sanitation and gardening

Construction of overhead Tanks for Water Distribution: College has a big over head tank with a capacity of about 25000 litres from which water is distributed to various departments, laboratories and wash rooms of students & staff through sub overhead tanks.

RO Drinking Water facility

Water Harvesting Pits: College has three big water harvesting pits at various locations which fall in the way of downing rain water. The rain water is tapped and useful for bore well recharge and also provide water for the nearby plantation
