

## BEST PRACTICES

- Air purifying plants – 14 Snake Plants (*Dracaena trifasciata*) were donated by Department Of Botany to reduce the toxic gases near the laboratories so that the staff and students can breathe in fresh air, as they also minimize cancer – causing pollutants, including CO<sub>2</sub>, benzene, formaldehyde, xylene and toluene.

Department of Botany

26

- **Mosquito Repelling Plants** – 20 Lemon grass plants
- (*Cymbopogon / Citronella grass*) were donated by Department of Botany to eradicate mosquito menace on the campus.
