DEPARTMENT OF CHEMISTRY

WEBINAR ON PLASTIC WASTE MANAGEMENT & CAREER

ASPECTS IN CIPET

The Department of Chemistry has Organized a Webinar on “**Plastic Waste Management And Career Aspects in CIPET**”(Central Institute of Plastics Engineering and Technology),Hyderabad. On 8/11/2021.

Speaker : Dr B. Srinivasulu,Principal Director.

CIPET,Hyderabad

Dr.V.Vijaya Lakshmi – Head, Department of chemistry

Ms B. Shanthikala – Convener

Ms B. Anitha – Co Convener

Report: Now a days plastic pollution has become one of the most pressing environmental issues,as rapidly increasing production of disposable plastic products overwhelms the world’s ability to deal with them. Various life cycle assessment studies have shown that plastics have lower carbon foot print than alternatives like paper,jute or cloth. Therefore management of discarded plastics is needed to stop the ill effect of plastics on the environment.

Dr.B.Srinivasulu sir has explained how to reduce plastics usage and also management of plastic waste in detail. He also discussed the effect of plastics on environment and to human beings & animals. He has given information regarding available UG,PG,PhD,Diploma & PG Diploma Courses in CIPET and also Career aspects of these Courses.

CIPET was established in the year 1987 and is located in Hyderabad,Telangana. It was started to provide training and technical services to the Plastics and allied Industries.

69 Students from Bsc I,II,III year participated in the program. Feedback was taken from participants after the webinar.

CHALLENGES

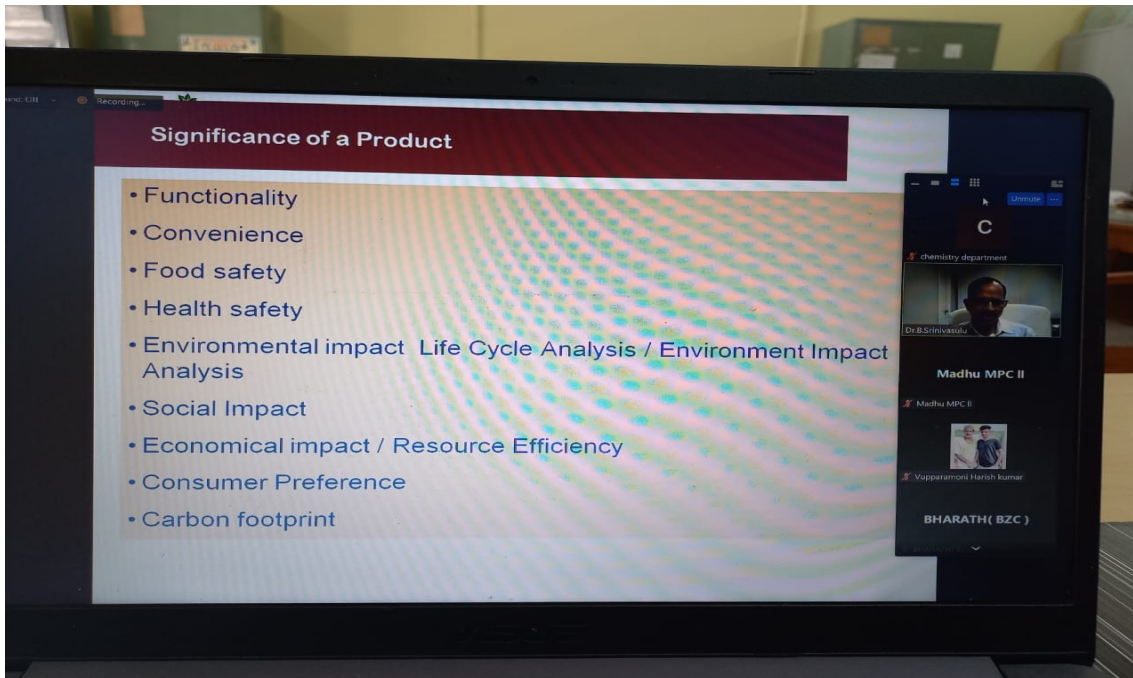

- All kinds of plastics mostly used in daily life are recyclable
- Real Challenge is collection, Segregation.
- Economic Viability ??
- Operational Sustainability ??

The slide also features a circular diagram of plastic bottles and a small inset image of a waste collection site. A video call interface is visible on the right side of the screen.

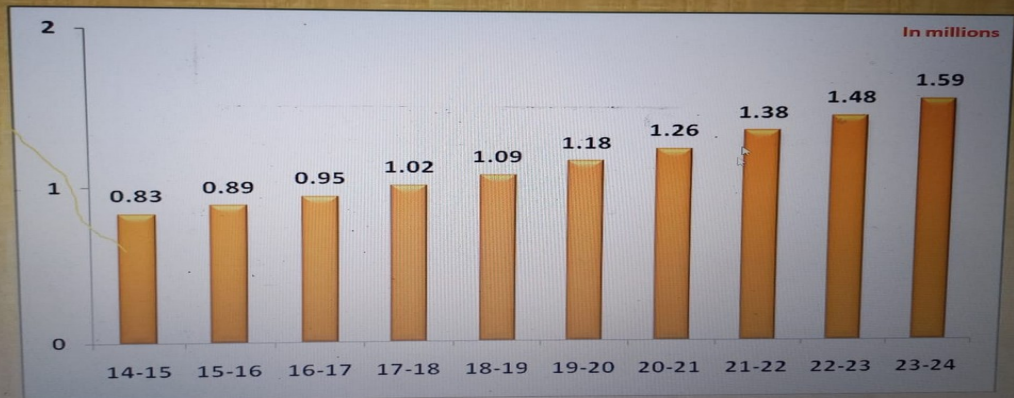

Significance of a Product

- Functionality
- Convenience
- Food safety
- Health safety
- Environmental impact Life Cycle Analysis / Environment Impact Analysis
- Social Impact
- Economical impact / Resource Efficiency
- Consumer Preference
- Carbon footprint

The slide is part of a video call presentation, with a participant list on the right side of the screen.

GOVERNMENT DEGREE COLLEGE, KHAIRATABAD

DEPARTMENT OF CHEMISTRY

WORKSHOP ON DAILY USED PRODUCTS

The Department of chemistry has organized a workshop on daily used products:

Detergents and Cosmetics on 23/12/2021

Detergents: Surf, Lysol, Harpic, Phenyl, Colin (Glass cleaner), Sanitizer

Cosmetics: Kumkum, Kajol, Lip balm, Handwash,

Detergents were prepared as per the Procedure by using required Ingredients.

These are less expensive methods, ingredient's cost is very less and preparation method is easy. These products can be prepared using easily available apparatus and containers. These are very useful for self-employment and also students can take up this as part time job.

Cosmetics were prepared herbal without using harmful chemicals, ecofriendly procedures. Usage of Cosmetics available in the market causes many side effects mainly allergies to skin etc.

Workshops introduce new ideas, inspire to participate and to further explore it on their own and promote actual process practice. It is a great way to teach hands on skills & experience as it gives learners an opportunity to try on their own.

Workshop on daily used products

Date : 23-12-2021

Time: 11:41am to 2:30pm

Venue: Government Degree College, Khairatabad. (On campus)

On Thursday, i.e.; 23-12-2021 chemistry department organised a workshop on daily used products in our college premises. The students and teachers participated in this workshop held in the chemistry department. The main aim to organise this workshop is to give knowledge to the students and develop their interest in chemistry and research further other than what they learned from books. Secondly, it aimed to show the progress of developing the best products in the market.

There were many daily used products displayed in the workshop. They were made by the students with the help and guidance of the chemistry faculty. All the items were fascinating. Students prepared and displayed products like organic kajal and kumkum, herbal cold cream, herbal sanitizer, herbal shampoo, sanitizer, lip balm, Colin, surf(detergent powder), phenyl, lizol, multipurpose cleaner.

First, an opening ceremony took place where in principal sir inaugurated the workshop and gave his valuable suggestions to all the participants. Next, participants explained about their samples to the jury. Jury asked their queries and helped students to upgrade their products. All participants were very enthusiastic.

At the end of the ceremony, the chief guest Chandana mam(physics department) announced the names of the winners. She distributed prizes to the winners. A memorable day came to an end, and the participants returned home with great joy.

These types of workshops are a source to increase knowledge and interest in the field of science.

Octopod demo to the faculty

Department of Botany and Microbiology organized One Day National Webinar on “Ecosystem Restoration” on **29th June, 2021**. Our Principal and JD (FAC) **Dr. DSR Rajender Singh** delivered key note address. Four invited speakers delivered lectures on different aspects of Ecosystem Restoration. The first speaker **Dr. A. Vijaya Bhasker Reddy**, Assistant Professor, Department of Botany, Nizam College (A), Osmania University spoke on the topic Biodiversity and Ecosystem Restoration. **Dr. Nageswara Rao Amanchi**, Assistant Professor, Department of Zoology, Nizam College (A), Osmania University delivered a lecture on Keys, Principles, Approaches and Interventions of Ecosystem Restoration. **Dr. Rama Chandra Prasad Pillutla**, Associate Professor, Lab for Spatial Informatics, IIIT, Hyderabad shared his knowledge on Remote Sensing and how the satellite images are helpful to know about the degraded and damaged ecosystems. The last speaker of the webinar **Dr. N. Srinivasa Rao**, Scientist, INCOIS, Ministry of Earth Sciences, Government of India, Hyderabad delivered his lecture on the role of remote sensing in ocean ecosystem along with flora, fauna, dust storms and oil spillages in the ocean. Faculty and students numbering 141 were registered from the states of Telangana, Andhra Pradesh, Karnataka, Tamil Nadu, Maharashtra and West Bengal. On that day 134 participants participated and all the participants received e-certificates after giving their feedback. The Organizing Secretary of the webinar was **Dr. K. Sarojini Chakravarthy**, Assistant Professor of Botany, **Smt. B. Sofia Rani**, Incharge, Department of Botany was the Convenor and the Co-convenors of the webinar were **Lt. Dr. P. Vijaya**, Assistant Professor of Botany and **Smt. P. Archana Mary**, Lecturer in Microbiology.

A ONE DAY NATIONAL SEMINAR ON

ECO SYSTEM RESTORATION

Organized By
DEPARTMENT OF BOTANY & MICROBIOLOGY

GOVERNMENT DEGREE COLLEGE
KHAIRATABAD, HYDERABAD – 500004
REACCREDITED WITH 'B' GRADE BY 'NAAC'

29TH JUNE 2021

INVITED SPEAKERS

DR. A. VIJAYA BHASKER REDDY
Assistant Professor,
Department of Botany,
Nizam College (Autonomous),
Osmania University, Hyderabad
Topic: Biodiversity and Ecosystem Restoration

DR. NAGESWARA RAO AMANCHI
Assistant Professor,
Department of Zoology,
Nizam College (Autonomous),
Osmania University, Hyderabad,
Topic: Ecosystem Restoration-Certain Key Approaches, Principles and Interventions

DR. N. SRINIVASA RAO,
Scientist,
Indian National Centre for Ocean Information Services (INCOIS),
Ministry of Earth Sciences,
Government of India, Hyderabad,
Topic: Ocean Environmental Challenges Observing Through Remote Sensing

DR. RAMA CHANDRA PRASAD PILLUTLA
Associate Professor
Lab for Spatial Informatics,
IIIT, Hyderabad
Topic: Remote Sensing Approaches in Understanding Ecosystem Restoration

ABOUT ECOSYSTEM RESTORATION

Ecosystem restoration means assisting in the recovery of ecosystems that have been degraded or destroyed, as well as conserving the ecosystems that are still intact. Restoration can happen in many ways. It is not always possible - or desirable - to return an ecosystem to its original state. Restoration could also remove 13 to 26 gigatons of greenhouse gases from the atmosphere. The emergence of COVID-19 has also shown just how disastrous the consequences of ecosystem loss can be. By shrinking the area of natural habitat for animals, we have created ideal conditions for pathogens - including coronaviruses - to spread. But we can build back better. The economic benefits of such interventions exceed nine times the cost of investment, whereas inaction is at least three times more costly than ecosystem restoration. All kinds of ecosystems can be restored, including forests, farmlands, cities, wetlands and oceans.

ABOUT GDC KHAIRATABAD

Government Degree College, Khairatabad which started functioning as New Government Degree College, Hyderabad was established in 1973 by the then Government of the combined state at Victoria Memorial Home, Saroornagar. A year later, in 1974, it was shifted to its present location, that is, at ChintalBasthi, Khairatabad.

The college has greenery campus established in 2.98 acres land. The college has 18 departments with Under Graduate 20 courses in Arts, Life Sciences, Physical Sciences, Commerce and Business Administration.

The total biomass of the human race accounts for just 0.01% of the life on Earth

Since the rise of human civilisation 83% of wild mammals have been lost

All life on Earth is made up of ... and found in ...

- 82% plants
- 13% bacteria
- 5% everything else
- 1% in the oceans
- 86% on land
- 13% deep sub-surface bacteria

Humans make up 0.01% of Earth's total biomass

83% of wild mammals

80% of marine mammals

50% of plants

15% of fish

We are all connected

Each species, no matter how big or small, has a mind-boggling impact on the ecosystem.

Ecosystems worldwide are under pressure...

- 1. FARMLANDS**
Croplands and pastures (modified grasslands on which domestic animals are grazed)
4.8 billion ha
Croplands and pastures cover 12% and 26% of the world's ice-free land
20% of croplands show stressed or declining productivity
- 2. FORESTS**
Tropical, subtropical, temperate, boreal and polar forests, plantations, low-density woodlands and agroforests.
4.06 billion ha
~31% of global land area
~420 million ha of forest have been converted to other land uses since 1990
- 3. FRESHWATER**
Rivers, lakes, wetlands and other inland waters
<0.01% of the earth's surface
35% average decline in area of natural inland wetlands since 1970, with 87% total loss since 1700
