

STUDENT STUDY PROJECT

SANITIZER PREPARATION:

Sanitizers are used to kill germs on your hands. To make a homemade sanitizer, you first need to wash your hands properly. There are some requirements for making homemade sanitizer. We don't need all the ingredients in bulk; we just need a little bit of alcohol, a cup of aloe vera, a few drops of essential oil and a special container. So let's start making our homemade sanitizer, now first take $\frac{2}{3}$ cup rubbing alcohol (Isopropyl Alcohol), $\frac{1}{3}$ cup of aloe-Vera and 5 to 10 drops essential oil. Put this amount in a clean bowl and keep stirring for 10 to 15 minutes. Now after mixing all the ingredients Whisk properly. Pour the mixture into a clean container. Do not touch it until it is ready. Label the container with the name. Now your homemade sanitizer is ready to use.

Precautions to be taken while making sanitizer are: do not smoke or use burning materials near sanitizer, keep away from small children, use proper hand gloves while making sanitizer.

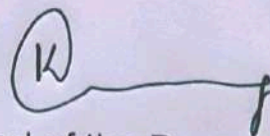

List of Students Participated in Project:

SNO	Name of the Student	Group	Year
1	A. Sunitha	B Z c	II IV SEM
2	K. Sindhu	"	II IV SEM
3	E. Sreeja	"	II IV SEM
4	M. Yogendhar	"	II IV SEM
5	S. Anusha	"	II IV SEM
6	K. Amulya	"	II IV SEM
7	Ch. Sahitya	"	II IV SEM
8	A. Upandal	"	II IV SEM
9	M. Ramya	"	II IV SEM
10	D. Sneharika	"	II IV SEM
11	D. Sudhakar	"	II IV SEM
12	K. Sharmila	"	II IV SEM
13	G. Raketh	MPC.	II IV SEM
14	T. Rajasheer	MPC	II IV SEM
15	R. Prathyusha	MPC.	II IV SEM
