Student Study Project

Title: "Andha Vishwash-Ek Nazar mein"

In India a large number of people believe in superstition since hundreds of years. As results some peoples had lost their valuable lives by implementing the above said superstition to solve their personal problems very blindly. So, if we take up some projects on superstition it is more benefits to the students to gain some knowledge on the topic "superstition".

And with that knowledge they will motivate the people not to depend on superstition blindly. This concept may change the lives of the people those who believe superstition blindly.
