CERTIFICATE COURSE ON "STATISTICS IN ECONOMICS"

Resource Person: Sri. S. RAMA RAO, Assistant Professor of Economics

Course Overview: The course will cover the essential aspects of statistics useful in Business economics viz: correlation and regression, probability and distributions, sampling and testing of hypothesis, and index numbers. The course will mainly emphasize the different statistical methods. Economic statistics is a topic in applied statistics and applied economics that concerns the collection, processing, compilation, dissemination, and analysis of economic data. It is closely related to business statistics and econometrics. Statistics for economics concerns itself with the collection, processing, and analysis of specific economic data. It helps us understand and analyze economic theories and denote correlations between variables such as demand, supply, price, output etc.

Class Learning Outcomes:

On successful completion of the module students will be able to:

1. To provide essential knowledge of the theory and key properties of probability and random variables, and the application of these concepts in practical situations.
2. To facilitate an understanding of the main branches of basic statistical inference, and to develop the ability to use statistical techniques to analyze data and assess the accuracy of the resulting estimates and conclusions.
3. To introduce the fundamental concepts of statistical modelling, particularly linear regression models. This course should be of value to those intending to study any course involving economic modelling or any further course in statistics.

Textbooks:

1. Statistics for Economics: Dr. DP Jain
2. Statistics for Economics: Desraj, Dhingra IC
3. Statistics for Economics: Telugu Academy Book for UG
