Title of the Best Practice:: Energy conservation

Objective:

To inculcate good habits of energy saving methods among students

The Context:

The students of science lead the programme. The department of Physics guides the students. The NCC and NSS teams support to conduct rally and awareness programmes. Every year some activities relating to energy conservation are being done. TSPDCL (Department of electricity) support our activities.

The Need:

Energy conservation is the important issue nowadays

Our country is developing country. The usage of energy resources has been increased in the world.

If this is continued for some more years, all the sources of energy get consumed

Hence we have to conserve the energy for the future. Every should take the responsibility of saving methods of energy.

The use of CFL bulbs, Solar Lights, LED bulbs must be increased.

Practice:

Our College Coeducation College. We started this Programme with a belief that if the student is educated in this field one generation can be saved.

We begin to educate students by organizing the activities like slogan writing, group discussions, seminars, debates and exhibitions.

They also played some important role in educating the society by participating in rallies, conducting exhibitions and surveys.

We take the help of TSPDCL, Narayanapet, and Our college NSS and NCC students.

Every year we observe Energy Conservation week in December.

EVIDENCE OF SUCCESS:

Students understand the importance energy understand the important of energy saving.

All the students visited the exhibitions conducted our college and learned the importance of energy conservation.

Some students convinced their parents in using Of CFL bulbs and LED bulbs.

Many students participated in slogan writing completion and rallies with enthusiasm.

Problems Encountered:

Because of Semester system, there is no sufficient time to organize too many programmes.

If we want to conduct exhibition, the students have to spend much time preparatory work.

Important activities by the Department.

Energy conservation week is observed from 14-11-2022 to 20-11-2022. A meeting was arranged on this occasion in meeting hall.

On 14-11-2022 an invited lecture was arranged in the college. Sri D.Chandra Mohan Deputy Engineer electricity Department, Narayanpet talked about the wastage Jo present resources and explained the need of preservation of resources for the future generations.
