Synopsis :-

organic farming is an Agricultural system that uses fertilizers of organic origin such as a compost manure, green manure and bone meal and places emphasis on techniques such as crop rotation and companion planting. It originated early in 20th century in reaction to rapidly changing farming practices

course content :-

As per the definition of the United States Department of Agriculture (USDA) study term on organic farming. Organic farming is a system which avoids or largely excludes the use of synthetic inputs (such as fertilizers, pesticides, hormones, feed additives etc) and to the maximum extent feasible rely upon crop rotation

Course outcomes :-

- * Reduce pesticides and chemical residues in soil
- * More nutritional value compared to conventional grown production
- * Tastes better than non-organic food
- * Promotes animals welfare
- * Improve immune system

GVOH Degree College (A.D.C), Adilabad

2021-22

60 Certificate Course - 2021-22

Organic Farming

Organised by : Department of Economics

Duration : 20 Hrs

Start Date : 11/04/22

End Date : 03/05/22

The Department of Economics with encouragement of Principal Smt: Dr. J Anitha conducted a certificate course on "organic farming" for the students of the college from 11/04/22 to 03/05/22 for 20 days programme. 30 students enrolled for the course. The course helped the students to learn the organic farming preparation how to make the organic farming and also the ^{basic} concept of organic farming.

Organic Farming Syllabus :

- * Types of Farming
- * Concept of different cropping system in relation to organic farming
- * organic farming process
- * plant Nutrients
- * maximum extent feasible relay upon crop relation
- * crop diversity
- * Biological Pests control
- * Green manure * Compost
- * weed management * Synthetic pesticides
- * Genetically modified organism
