### **25.09.2018 – Arboretum, SR & BGNR Govt. College, Khammam**

**Field Trip to the Pond near Buddha Stupa, Nelakondapally**

**A.Y. 2018-19 Dt. 08.10.2018**

**Request Letter**

Khammam,  
Dt.05.10.2018

To,  
The Principal,  
Government Degree College for Women,  
Khammam

Sub: Request for Permission to conduct Field Visit – I year I semester  
Botany students of Govt. Degree College for Women, Kmm- Reg.

This is to submit that as part of BSc. I semester Botany curriculum, we intended to organize a field study at Pond near Buddha Stupa, Nelakondapally, so that our students get acquainted with POND ECOSYSTEM.

Hence, we request you to kindly permit our Botany I year students (32 members) on Monday i.e., 08.10.2018 to visit the pond near Buddha Stupa, Nelakonapally.

Thanking You,

Yours Faithfully,

  
**PRINCIPAL**  
Govt. Degree College for Women  
**KHAMMAM.**

  
Dr. R. Sneha,  
In Charge,  
Dept. of Botany,  
Govt. Degree College for Women, Khammam

## On Field

**Student Outcomes:** Students observed primary producers: grass & hydrophytes, primary consumers: tadpole larvae, small fish & other aquatic insects, secondary consumers frogs & crabs. Students learn that a pond is a fresh water ecosystem and it's a smallest structural and functional unit of nature or environment.

## STUDENT FEEDBACK

Sk. Shabana, I BSC BZC

Myself Shabana, student of Govt degree college for women, sharing my experience regarding field trip.

I had a privilege of participating in a remarkable field trip to the pond ecosystem in Nelakondapally, and I'm delighted to share my feedback.

We have started in early morning, and to encourage use collectors Sir also joined, by 40 minutes we have reached to the Buddha stupa located in Nelakondapally.

There we have collected Algal mixture, the process of collecting is so funny & informative regarding knowledge about ecosystem dynamics.

What truly made my experience to another level is the beauty of nature, sound of water, smell of soil & the freshness of trees, at that time I had understood that NATURE REALLY HEALS OUR SOUL and also understood that little things in the environment make the world so harmonic.

In conclusion, the pond ecosystem field trip is unforgettable journey of learning, exploration and appreciation.

I heartfully thanks my lecturer P. Krishnaveni madam for taking care of us and made us understand little the importance of little things in the world.

Sk. Nasreen, I BSC BZC

Field Trip Feedback: Buddha stupa, Nelakondapally

I had the privilege of participating in a field trip to the Buddha stupa located in Nelakondapally, Khammam district. The trip was organised as part of exploration of historical & cultural landmarks and also to explore flora species by our beloved Krishnaveni mam.

The Buddha stupa at Nelakondapally stands as a testament to rich Buddhist heritage of the region. The moment I set eyes on the Buddha stupa, I felt a sense of awe and reverence. Interacting with my fellow classmates during trip was enjoyable and our guide Ravi kumar and Krishnaveni mam made us to learn many floral species which are native to the place. We collected some plant species, algal species from pond near the stupa.

My favourite part was we had all had lunch together under the shades of trees which was pleasant experience. The trip was truly enriching experience. I am grateful for the opportunity and thankful to our guides Krishnaveni mam for being always the supporter.

Shaik Nasreen, Msc.
