CENTRE (TSKC)**

INTERNSHIPS

We conducted internship programme in association with Digital Equity, Hyderabad.

India is a country with the largest population of young people under the age of 30. This can be both a boon and a bane for the nation. However, not having access to digital information can cause a great loss to individuals and communities. Ignorance of the ill effects of the digital world and technology can be even worse. The question of whether the internet and technology are good or bad for us is irrelevant, as there is no going back. India consumes more misinformation compared to the average consumption of the rest of the world. Mindless usage of devices and the internet is growing exponentially.

With the rise of information technology, the gap that is being created between informed individuals and uninformed individuals is a great threat to the nation. In the battle of quality information and misinformation, the latter is like a pandemic that keeps individuals engaged, outperforming their critical thinking, and killing time.

To solve this, Digital Equity is leading the digital inclusion movement in India. We have developed a model to reach children even in the remotest parts of the country, providing them with a safe, respectful, inclusive, and collaborative learning environment. Well-trained and informed individuals guide students on how to use the internet safely and effectively, helping them in bridging learning gaps, making informed decisions, and connecting with the world.

I am Omkarnath, Co-Founder and CEO of Digital Equity. Digital Equity (registered name Coding For All Foundation) is a non-profit organization with a mission to **empower underprivileged children through digital literacy**, providing equal access and opportunities in safe and inclusive environments to enhance employability and promote equity. Our Core Values are Respect, Inclusion, Freedom and Safety, Collaboration over Competition, and Equitable access.

We run our flagship program called “Digital Essentials” **free of cost in government and affordable private schools**. The program covers topics across segments such as digital skills for living, learning, working, social collaboration, and internet ethics & sensitization.

To run the [Digital Essentials](#) program in schools, we recruit committed, compassionate and inclusive **degree college students** from the same district and provide them with an **internship** that helps them **build professional skills** and **contribute towards society** by imparting digital literacy to underprivileged children.

We would like to conduct a recruitment drive in your college and offer internships to students.

Details of the recruitment drive which will be a half day session for students of batch 2021(non passing out students) and later:

1. Orientation program about the internship. Need a projector, speaker and internet.
2. 3 to 4 classrooms for conducting recruitment.
3. 1 or 2 members from college for support and coordination.
4. Drive can be done only if there are a minimum of 200 students.

Please let us know a convenient day for us to conduct the recruitment.
