

## Govt. Degree College Narsapur, Medak District

### Green Campus Initiatives

As part of the Green initiatives in the campus, the college always tries to reduce the waste through reuse, reduce and recycling which ensures the cleanliness and eco-balance in the campus. As part of the plastic-free campus initiative, the college ensures the green protocol in the various programs of the college. Conducting programs related to water, environment, pollution to create awareness among students and make them responsible citizens.

College has Eco Club to conduct various Environmental Awareness Programs, and to implement eco-friendly initiatives in the college campus.

1. Every year college will conduct Green Audit to assess the environmental quality of the campus. Students along with Staff will conduct this audit. Students are directly involving in this audit so that they are learning many things like conservation, maintenance of natural resources, how to reduce waste, what kind of procedures they need to follow to maintain the beauty of the nature.
2. Rain water harvesting pits constructed to increase ground water levels, and to recharge borewell.
3. Eco Club of GDC Narsapur every year create awareness on how to celebrate Holi festival in an eco-friendly manner..By attending this program students learned how to celebrate Holi without using artificial colors. They started preparing natural colours and celebrating holi with the natural colours which have been prepared by using various plant materials..
4. Every year we are celebrating Forest Day, Water Day, Meteorological Day, Earth Day etc.. to raise environmental awareness among Students and make them involving to educate their parents and family members regarding environmental issues.
5. Majority of Students and Staff members are using public transport to reduce carbon emissions..Remaining Staff and Students are also using bike pooling ,Car pooling to reach the college. So that pollution caused by vehicles was reduced very much.
6. College campus was declared as plastic free zone. So that everyone using reusable steel water bottles, lunch boxes, plates and cups. So that Solid waste (Plastic, paper cups, plates) was reduced greatly.
7. During day time we will avoid using lights. Electric, electronic devices will be unplugged when they are not needed.
8. Everyone will turn-off the fans, computers, printers etc Whenever they are not required.
9. Every year plantation program i.e., Haritha Haaram will be conducted by Eco Club and NSS Units to raise green cover in the college campus.
10. To maintain the cleanliness in the campus we will conduct Swachh Campus, Swachh Bharath Programmes by NSS Unit on regular basis.
11. Every year we are celebrating world environment day .On this day Students will conduct rallies to the near by villages to educate the public.

12. Some of the Students of Gdc Narsapur prepared Seed balls and created awareness how to prepare seed balls, and their use to increase the green cover.
13. By collecting dried leaves, twigs and other plant debris from the campus plants Students preparing compost in the college campus.
14. Eco Club of GDC Narsapur creates awareness on eco friendly Ganesh Chaturdhi celebration by using Clay idols instead of using POP (Plaster Of Paris ) idols to protect the water bodies from pollution.
15. To protect Ozone layer Eco Club will conduct Awareness on World Ozone Day every year. By attending this program students will take proper measures to save Ozone layer.
16. While providing study materials we started using e- Content i.e., Soft copies of study material, ppts & video lectures instead of giving hard copies/ printouts to reduce paper usage and wastage.
17. Every year we are conducting Awareness Program on Eco Friendly Diwali celebrations..By attending this program students started celebrating Crackers free, pollution free Diwali.
18. To educate the public, communities we started conducting Outreach programs .So that we can educate the people regarding environmental issues.
- 19.To minimize the paper wastage we generated QR Codes to plants. Instead of placing display boards to provide plant details we can tag the plants with the QR Codes..By Scanning the QR Codes we can know the details of campus flora.
