

Out-Reach Programme

2022-2023.

Dept. of CHEMISTRY

Govt. Degree College
Kollapur

commencement of practicals for Sr.
Intermediate at Kollapur.

- ① I had attended a outreach programme at Model high school and Govt. College situated at Kollapur mandal of Narsarao Kurnool distt, on 24, 25, 27th January 2024. I instructed to student, which precautions should take at practical times; such by using acids, Bases, Glassware, instruments, KIPS apparatus, etc. At the same time when a

person or student effected with acid on body,
(or) inhale fumes of concentrated acid, ammonia
fumes, how to prevent these effects.

(2) Analysis of Sample Salt:

Gravimetric Analysis: How to find out
cations and anions in a sample salt. Anions are
classified in to three groups and their
reagents. cations classified in to six groups and
their reagents.

(3) Volumetric Analysis:

Explained about Usage of pipette, Burette,
Conical flask, retort stand etc. apparatus. Acid
- Base titration, Redox titration, Permanganometric titration
- And also explained how to find out End point,
calculations, to find out weight of product solution
