Title : Bio-diesel plants

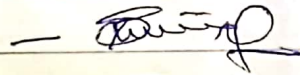

**Introduction :** Renewable source of energy that can help reduce green house gas emissions & minimize the carbon foot print of agriculture.

**Opinion of the students :** Bio-fuels is that they release less  $CO_2$  when burned compared to fossil fuels. It is argued that this  $CO_2$  emission is balanced by regrowth of these crops.

**Conclusion :** Bio diesel is a clean-burning fuel that is renewable & biodegradable
