PHYSICS LAB

SAHA INSTITUTE OF NUCLEAR PHYSICS KOLKATA

The Saha Institute of Nuclear Physics (SINP) is a premier center for research and training in physical and biophysical sciences located in Kolkata, India. The institute is named after the famous Indian physicist Hrishikesh Chandra Saha.

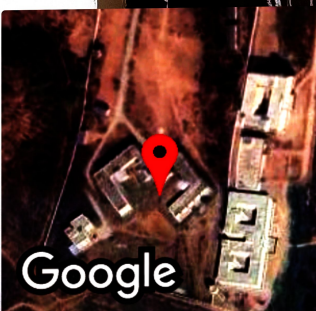

The Nuclear Physics Division constitutes research and development projects in nuclear structure physics and associated developmental projects. The division is centered around the development of Facilities for Nuclear Astrophysics (FENA).

A journey which started around the design and development of the Variable Energy Cyclotron (VEIC) has culminated with the availability of energetic alpha-particle beams from the VEIC since 1980s, and the advent of high-resolution germanium detectors for investigations of the structure of a number of nuclei. This has led to the undertaking of nuclear excitation mechanism, nuclear-nucleus reaction mechanisms was undertaken. A quantitative jump in this research field took place in 1990s with the availability of Pelletron facilities capable of delivering different species of ions. The country and the availability of large gamma- and charged particle accelerator centers.

The college offers a Ph.D program (including pre-M.Sc), an undergraduate associateship program, and a summer mode for all programs is online. The minimum eligibility for a degree in Physics or Chemistry. Students are selected on the basis of graduation examination and the rank held in the Entrance Examination. Students admitted to Post M.Sc courses as Junior Research Fellows.
