PHYSICS LAB

**SAHA INSTITUTE OF NUCLEAR PHYSICS
KOLKATA**

The Saha Institute of Nuclear Physics (SINP) is a premier center for research and training in physical and biophysical sciences located in Kolkata. The institute is named after the famous Indian physicist Hrishikesh Chandra Saha.

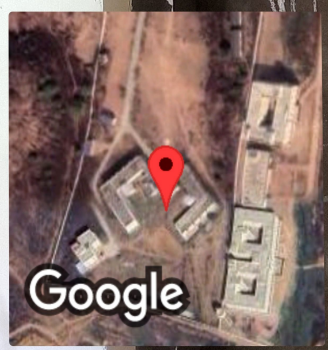

The Nuclear Physics Division constitutes researchers working in the areas of nuclear structure physics and associated developmental projects. The Astrophysics division is centered around the development of Facilities for Research in Nuclear Astrophysics (FRENA).

A journey which started around the design and development of the Variable Energy Cyclotron (VEIC) in the late 1970s, culminated with the installation of the Variable Energy Cyclotron (VEIC) in 1983, and the advent of high-resolution germanium detectors for the investigation of the structure of a number of nuclei. The research program undertaken to study the nuclear excitation mechanism, nuclear-nucleus reaction mechanisms was undertaken in the late 1980s. A quantitative jump in this research field took place in 1990s with the installation of Pelletron facilities capable of delivering different species of ions. The country and the availability of large gamma- and charged particle accelerator centers.

The college offers a Ph.D program (including pre-M.Sc), an undergraduate associateship program, and a summer internship program for all programs is online. The minimum eligibility for admission to a degree in Physics or Chemistry. Students are selected on the basis of their performance in the graduation examination and the rank held in the Entrance Examination. Students admitted to Post M.Sc courses as Junior Research Fellows.
