PEDDACHINTAKUNTA, NARSAPUR, MEDAK

## JIGNASA- STUDENT STUDY PROJECT (2022-23)

### DEPARTEMENT OF ZOOLOGY

**TITLE: MANAGEMENT OF POULTRY FARMING IN PEDDACHINTAKUNTA**

**Project done by**

1. V.MEGANA , BSC( BZC) II YEAR, (6021-21-445-532)
2. G.ASHWINI , BSC( BZC) II YEAR, (6021-21-445-005)
3. G.SRIVANI , BSC( BZC) II YEAR , (6021-21-445-515 )
4. B. SRAVANI, BSC( BZC) II YEAR, (6021-21-445-506)
5. P. AKHILA, BSC( BZC) II YEAR , (6021-21-445-527)
6. MD.RIYAZ, BSC( BZC) II YEAR , (6021-21-445-013)

**Supervisor**

**CH.Haritha**

**Lecturer in Zoology**

**Principal**

**Dr.P.Damodar**

**M.Sc,Ph.D**

## **AIM**

- TO KNOW THE MANAGEMENT OF POULTRY FORM IN VILLAGE AREAS
- CHECK BROODING PROCESS

## **OBJECTIVES**

- To know village area people how to manage poultry farm in low budget more production.
- To meet the growing demand of eggs, I intended to establish a layer poultry farm.

## **METHODOLOGY**

- We should followed the methodology of survey method & questionnaire.

## **FINDINGS AND ANALYSIS**

- We have to learn about poultry farm equipments how to use.
- Students had learned future employment.

## **INTRODUCTION**

- Poultry industry is the fastest growing sector in India animal husbandry.
- The beginning of egg laying at 16-20 weeks of age and then which stimulates the hens to continue laying eggs all year round.

## **LOCATION**

- Electricity is an essential component for poultry farming as it is required for brooding of chicks.
- In the absence of assured of water supply a tube well / hand pump is proposed on the farm.

## **HOUSING**

- Construction of a brooder-cum-grower house measuring at 1 sq feet in a case of layer
- Besides it the farm will have a small store room, servant's quarters.

## **EQUIPMENT**

- Standard equipments are available from various equipment manufacturers located in the nearby city.

## **INCUBATOR**

- Incubator is such poultry equipment which is used for hatching the bird's egg in artificial ways.

## **FEEDER**

- Generally some food kept in the feeder and the poultry birds starts eating food from there.

## **WATER POT**

- Water pots are of various types water can be served by a simple water pot or through pipe line.

## **EGG HANDLING NEST**

- Egg handling cages are used for transporting eggs from one place to other places.

## **POULTRY DISEASES PREVENTION & TREATMENT**

### **STRENGTHS**

- It has tremendous potential to create non-farm employment and check migration from rural to urban areas

### **OPPORTUNITIES**

- Consumption in rural area is increasing day by day therefore is large scope for poultry farming.

### **CONCLUSION**

- According to data analysis village area people how to manage poultry farm in low budget more production.
- How to maintain poultry farm equipments.

### **REFERENCE**

Sources: Information gathering from poultry farm workers.
