

## I. STRATEGIC PLAN:

We envisage Govt., Degree College, Patancheru evolving into a robust higher education institution offering demand driven qualitative higher education to students in the State of Telangana and particularly in the area of Patancheru. In order to fulfill the dream, we prepare strategic plan.

- **Leveraging infrastructure:** The existing infrastructure is to be leveraged to take the institution to the next level where it would be able to meet the higher educational needs of the State in general and the region in particular.
- **Strengthening the infrastructure:** The existing infrastructure shall be strengthened to facilitate institution growth in the dimension of academics. Learning resources such as library, laboratories shall be expanded to meet the growing demand.
- **Creation of new infrastructure:** New infrastructure such as class rooms, games and sports facilities shall be created to supplement the existing facilities. Consistent growth in student admission puts pressure on existing facilities and hence there is a need to create new infrastructure.
- **Generation of Resources:** The institution is funded by Government and often the funding is inadequate to meet the growing needs of the institution and hence it is imminent on the part of the institution to explore various options of raising resources. The institution was able to secure a fund to the tune of Rs.4.50Crore in the form of building constructed under Corporate Social Responsibility by Aurobindo Pharma Ltd. In this direction, new relations shall be forged with corporate entities in the area with intent of securing funding.
- **Academics:** The institution is a non-autonomous affiliated college functioning under the fold of Osmania University, Hyderabad. Autonomous status provides the institution with academic freedom in respect of devising new courses suitable to the dynamic needs of industry. Therefore, institute shall endeavor to acquire autonomous status.
- **Enhancing faculty strength:** The existing faculty strength shall be increased to improve the teacher student ratio. The college functions under the administrative control of the Commissionerate of Collegiate Education, Telangana State and therefore request for sanction of additional teaching posts has already been submitted.
- **Optimal Utilization of Resources:** Suitable institution-level Management Information System (MIS) shall be devised and executed with the objective to optimize utilization of the resources.

## II. OBJECTIVES:

- Enhancing student enrolment to 1000 from the existing in the next five years
- Offering more than fifteen course combinations by introducing more demand driven courses in the next five years
- New classrooms and laboratories shall be created to meet the growing demand. If needed vertical expansion of the college building shall be taken up with due permissions from the authorities concerned.
- New laboratories shall be established in addition to the existing to provide practical learning experience to students and teachers as well. Chemistry, Botany and Zoology laborites shall be doubled.
- Information technology shall be applied in academic and administrative monitoring and in this regard institution-level Management Information System (MIS) shall be created and adopted.
- Institutionalizing and internalizing all quality processes and thereby get the best possible grading by quality assessment agencies.
