

JIGNASA - STUDENTS STUDY PROJECT

(2019-2020)

TITLE: “Comparative analyses of certain health risk factors employing Quetelet Indices and allied methods of Faculty members, Non-Teaching staff and UG students of Government Degree College, Hayathnagar, Ranga Reddy District.”

SUBJECT : ZOOLOGY

STUDENT PARTICIPANTS :

1. **N. VANAJA**, B.Sc. BZCA I Semester (EM)
2. **S. KALYAN**, B.Sc. BZC I Semester (EM)
3. **R. ANUSHA**, B.Sc. BZC I Semester (EM)
4. **MD. ASAD**, B.Sc. BZC I Semester (EM)
5. **T. CHANDANA SIRI**, B.Sc. BZC I Semester (EM)

MENTOR : **Dr. N. Rajkumar**, M.Sc., Ph.D., ADBI, SET

Asst. Prof. of Zoology

COLLEGE : Govt. Degree College, Hayathnagar,
Ranga Reddy District – 501505

DECLARATION

We hereby declare that the Students Study Project entitled "Comparative analyses of certain health risk factors employing Quetelet Indices and allied methods of Faculty members, Non-Teaching staff and UG students of Government Degree College, Hayathnagar, Ranga Reddy District" is submitted by us is original project work and it has been carried out under the supervision and guidance of Dr. N. Rajkumar, Asst. Prof. of Zoology, GDC, Hayathnagar."

1. N. VANAJA, B.Sc. BZCA I Semester (EM)
2. S. KALYAN, B.Sc. BZC I Semester (EM)
3. R. ANUSHA, B.Sc. BZC I Semester (EM)
4. MD. ASAD, B.Sc. BZC I Semester (EM)
5. T. CHANDANA SIRI, B.Sc. BZC I Semester (EM)

Place: Hayathnagar

Date: 22-11-2019

ACKNOWLEDGEMENTS

We would like to express our sincere thanks to Dr. N. Rajkumar, Asst. Prof. of Zoology for his vital support, guidance and encouragement, without which, this project would not have come forth. We would also express our thanks to Sri B. Sreenivas Reddy, Asst. Prof. of Zoology for helpful discussions for making this project and we take this opportunity to thank Sri. Dr. J. Rajaram, Principal of our college for vital support and encouragement.

1. N. VANAJA, B.Sc. BZCA I Semester (EM)
2. S. KALYAN, B.Sc. BZC I Semester (EM)
3. R. ANUSHA, B.Sc. BZC I Semester (EM)
4. MD. ASAD, B.Sc. BZC I Semester (EM)
5. T. CHANDANA SIRI, B.Sc. BZC I Semester (EM)

Place: Hayathnagar

Date: 22-11-2019

CERTIFICATE

This is to certify that the study project titled "Comparative analyses of certain health risk factors employing Quetelet Indices and allied methods of Faculty members, Non-Teaching staff and UG students of Government Degree College, Hayathnagar, Ranga Reddy District" submitted is a bonafide project done by

1. N. VANAJA, B.Sc. BZCA I Semester (EM)
2. S. KALYAN, B.Sc. BZC I Semester (EM)
3. R. ANUSHA, B.Sc. BZC I Semester (EM)
4. MD. ASAD, B.Sc. BZC I Semester (EM)
5. T. CHANDANA SIRI, B.Sc. BZC I Semester (EM)

Hayathnagar
Date: 22-11-2019

In-Charge. Dept. of Zoology
Sri B. Sreenivas Reddy
Asst.Prof. of Zoology
Govt. Degree College,
Hayathnagar

Title : Comparative analyses of certain health risk factors employing Quetelet Indices and allied methods of Faculty members, Non-Teaching staff and UG students of Government Degree College, Hayathnagar, Ranga Reddy District.

Hypothesis : To test whether the subjects under study are healthy or unhealthy.

Aims & Objectives:

1. Determination of weight status of the subjects i.e. Underweight, Normal weight (healthy), Overweight or Obese.
2. Assessment of certain risk factors associated with obesity viz., blood pressure, body fat percentage etc.
3. Data collection of subjects regarding Exercise and Physical inactivity etc.
4. Comparative analyses of Quetelet indices between
 - A) Teaching and Non-Teaching Staff
 - B) UG Students of B.A., B.Com & B.Sc Courses
 - C) Male and Female subjects
5. Suggestions and Corrective measures for a healthy lifestyle based on the findings of the study.

REVIEW OF LITERATURE:

Body mass index (BMI) is a measure of body fat based on height and weight. It is a useful indicator of underweight, healthy weight, overweight or obese of the subject under investigation. It is a good gauge of one's risk for diseases that can occur with more body fat.

It was initially developed by **Lambert Adolphe Jacques Quetelet**, a Belgian astronomer, mathematician, statistician and sociologist. He called it as “social physics” (1830-1850). BMI is also known as Quetelet Index. **Ancel Keys**, an American scientist in the area of diet and health, has introduced the term “Body Mass Index” in his paper published in ‘Journal of chronic diseases’ in July 1972. In France, Israel, Italy and Spain, legislation has been introduced banning usage of fashion show models having a BMI below 18. This is done in order to fight anorexia (an emotional disorder characterized by an obsessive desire to lose weight by refusing to eat) among models and people interested in fashion.

RESEARCH METHODOLOGY:

Study Setting: The present study was undertaken to assess the Quetelet indices and associated parameters of the Faculty members, Non-Teaching Staff and undergraduate students of B.A., B.Com and B.Sc., of Government Degree College, Hayathnagar, Ranga Reddy district of Telangana State.

Sampling: The sample size taken for this investigation was 50 each (large sample i.e. >30) from the undergraduate students of B.A., B.Com and B.Sc. Courses while the total staff members participated in this study was 39 i.e. 25 from Teaching Staff and 14 from Non-Teaching Staff members.

Research Methodology: The study project was designed to estimate the Quetelet indices or Body Mass Indices of the subjects under study and categorize them as underweight, normal weight or healthy weight, overweight and obese. In order to calculate the BMI of the subjects, weight in kilograms and height in centimeters were collected using **Weighing machine** and a **measuring tape** and an **online tool** (BMI calculator) was employed for this purpose.

This study also included the estimation of other parameters such as **Blood Pressure**, **Pulse**, **Body fat percentage**, **Ideal weight**. The blood pressure and pulse were measured using **Automatic Blood pressure monitor model HEM-7111(Omron)**. Body fat percentage was calculated using **online tool** (body fat calculator) involving **gender**, **age**, **weight**, **height**, **girths of neck**, **waist** and **hip** in cm. Ideal weight was estimated by using Ideal weight calculator involving age, gender, height in cm based on popular formulas such as Robinson(1983), Miller (1983) etc.

Measuring Tape

Weighing Machine

Automatic Blood Pressure and Pulse Monitor

Model HEM-7111(Omron)

Monitoring of BP and Pulse of Non-Teaching Staff

Measuring Body Weight and Height of Teaching Staff Member

Table 6. BMI TABLE FOR ADULTS (Age 18 or Older)

(According to WHO Recommendations)

Category	BMI Range in Kg/m ²
Severe thinness	< 16
Moderate thinness	16 - 17
Mild thinness	17 - 18.5
Normal	18.5 - 25
Overweight	25 - 30
Obese Class I	30 - 35
Obese Class II	35 - 40
Obese Class III	> 40

Table 7. IDEAL BLOOD PRESSURE ACCORDING TO AGE CHART

Age in Yrs	Female	Male
<2	80/34 to 120/75	83/38 to 117/76
3	100/59	100/61
4	102/62	101/64
5	104/65	103/66
6	105/68	104/68

Table 8. BLOOD PRESSURE CHART

SYSTOLE	DIASTOLE	CATEGORY
210	120	Stage 4 of High BP
180	110	Stage 3 of High BP
160	100	Stage 2 of High BP
140	90	Stage 1 of High BP
130	85	High Normal BP
120	80	Normal BP
110	75	Low Normal BP
90	60	Borderline Low BP
60	40	Too Low BP
50	33	Dangerously Low BP

**Table 9. AMERICAN COUNCIL ON EXERCISE
BODY FAT CATEGORIZATION**

Description	Women	Men
Essential Fat	10 - 13 %	8 - 14 %
Athletes	14 - 20 %	6 - 13 %
Fitness	21 - 24 %	14 - 17 %
Average	25 - 31 %	18 - 25 %
Obese	32 + %	25+ %

RESULTS / FINDINGS:

A random sample of 50 students each from B.A., B.Com, B.Sc was chosen including males and females while sample size of Teaching and Non-Teaching Staff was about 39 altogether i.e. 25 Teaching Staff members and 14 Non-Teaching Staff Members.

The analysis of **Body Mass Indices** results of Teaching Staff indicate that about 60% of them are Overweight category, 8% under Obese category while 32% of them were under normal or healthy weight category (refer Chart 1). Similarly the results of BMI indices of Non-Teaching Staff reflect the fact that about 79% fall under overweight category while 21% under healthy weight category (refer Chart 2). On comparative analyses, it is evident that B.A. Students showed highest percent (12%) under overweight category while B.Sc. students displayed highest percent (56%) under Underweight category. The descending order of Normal weight category is B.A.(58%), B.Com(52%) and B.Sc. students(40%)(refer Charts 3,4,5).

The analysis of **Blood Pressure** results of Teaching Staff indicate that about 44% of them are under High BP category while 56% of them were under normal BP category (refer Chart 6). Similarly the results of BP of Non-Teaching Staff reflect the fact that about 50% fall under High BP category while 50% under normal BP category (refer Chart 7). On comparative analyses, it is evident that B.Sc. students showed highest percent (22%) under High BP category followed by B.Com(20%) and B.A.(16%) while B.Sc. students displayed highest percent (8%) under Low BP category followed by B.A. and B.Com(4% each). The descending order of Normal BP category is B.A.(80%), B.Com(76%) and B.Sc. students(70%)(refer Charts 8,9,10).

The analysis of **Body fat %** results of Teaching Staff indicate that about 44% of them are under Obese category while 48% of them were under Average category and 8% under Fitness category (refer Chart 11). Similarly the results of Body fat % of Non-Teaching Staff reflect the fact that about 71% fall under Obese category while 21% under Average category and 7% under Fitness category (refer Chart 12). On comparative analyses, it is evident that B.Com. students showed highest percent (12%) under Obese category followed by B.A. and B.Sc.(6% each) while B.A. and B.Com students displayed highest percent (20%) under Average category followed by B.Sc. The descending order of Fitness category was B.Sc. The descending order of Athletes category was B.A.(56%), B.Com(38%) and B.Sc. students(30%)The descending order of Essential Fat category was B.Sc.(20%), B.Com(14%) and B.A. students(6%). (refer Charts 13,14,15)

The analysis of Pulse results of Teaching Staff indicate that about 8% of them are falling under Tachycardia(heart beat greater than 100) category, 4% under Bradycardia (less than 60) category while 88% of them were under normal pulse category (refer Chart 16). Similarly the results of Pulse results of Non-Teaching Staff reflect the fact that about 14% fall under Tachycardia category while 7% under Bradycardia category while 79% of them are under Normal pulse category (refer Chart 17). On comparative analyses, it is evident that B.Sc. Students showed highest percent (30%) under Tachycardia category followed by B.Com (20%) and B.A. (16%). Under Normal pulse category the descending order was 84% of B.A., followed by 78% B.Com and 68% B.Sc. students. On the other hand, 2% each of B.Com and B.Sc students exhibited Bradycardia while B.A. students showed no results under that category (refer Charts 18,19,20).

CONCLUSIONS AND SUGGESTIONS :

1. Those subjects under overweight and obese categories should manage their diet, do regular exercise to burn their fat and follow Yoga for a healthy lifestyle.
2. In order to maintain a normal blood pressure, care should be taken about salt intake (not to exceed 5 gm per person per day) and sufficient hydration should be managed.
3. Regular checkups of BMI, waist circumference, body fat percentage helps us to reach and maintain target weights in relation to our height and age.
4. For a healthy heart, the intake of Low Density Lipoproteins(LDL) cholesterol(bad) should be decreased while the intake of High Density Lipoproteins(HDL) cholesterol (good) should be increased to optimum levels. Increase fiber-rich foods in your diet.
5. Control stress levels by participating in games, sports, yoga and meditation.
