= ECONOMIC IMPORTANCE OF BACTERIA 16=

Bactegia influences human life both in a positive way as well as in a degative way Backenia age dispectly in indispetly useful to clan and also causes segious disease to bumans and capps as well. This way bacteria age considered tues as well as fallends to come important bagmful and useful activities of bacteria as follows. I hope to do to the the apple

4] useful Backenia:=

May bacteria age useful to Man in agricu - Ituge, Endustry, Medicine and Biotechonology "I Decomposing plant and animals and plants get decomposed use to the activity of "Sapprophyti backing"

These bacteria through decomposition Makes simple organic Molecules from complex organic croleccules due to this dutalients on different element in datage continuously specycled and

GROUP == BZE ela Interna central ares of the stoot and stem which ite after and philoen as a Cylindrical from 2s talled rascular cytinder! rascu cypinder is not torned in the lower groups of plants such as the Couptryans like - thallophyta and Brypphyta. To is seen in pteridophyte This is the skason why pterdophyta plants are seperced to as vascularcomptogams tes as welly Dascelar Cytender of ptordophe show very recomplese from of Vascular system.
The Evolution of Grand System. The Evolution of Vascular cylinder occurs Complex. Th from simple to and gymnosperons, the vascular Etements are different from angrosperors mylen of these groups constitutes tracherds and rylen parenchyma, but vessels fibres are absent. Similarly in phloen speve cells and pholoen parenthyma are present and Companion cells are Substituted by albumen cell which stores protein. van Treghen and Doublot (1886) proposed the stelar theory According to which the shoot and stem have the same basic 对外2000 Stable of the St
