Best Practices of Govt. Degree College for Women, Nalgonda 2019-20

Student Result Management System

1. **Objective of the Practice**: To find the academic progress of a student at a single entry

2. **Need Addressed and the Context**: The intake of the Government Degree College for Women, Nalgonda is increased three folds in the recent years and there are 2174 students in the year 2019-20. As the college adopted C.B.C.S, the results of 6 semesters in each year in various combinations used to be recorded manually. Departments of the college used to get the results of their subjects from University site and record in their registers. Departments used to analyze the results subject wise and the same were consolidated. But it was very difficult to find the overall result of a student at a glance until final memorandum of marks is issued by the University after passing all the subjects. To address the problem it is decided to have a platform, which can give the status of all university results of a student at a glance with a single entry.

3. **The Practice**: As the required result management system costs a lot if any external agency is involved, it is decided to prepare an excel program compiling all the data available using the interested Mathematics & computer science students and Mathematics & computer science faculty. Data from all the departments was collected and compiled and an excel program is prepared under the guidance of IQAC Coordinator, to get the results of a student pertaining to all semesters glance with a single entry of their Hall Ticket.

4. **Evidence of Success:** With the above result management system prepared in the college, it is now very easy to get the consolidated result of any student instantly which in turn enables to identify student's backlog subjects at the examination branch. The same Data is shared to the mentors for their assessment and further interaction with their mentees and guiding the student to undergo the remedial coaching. It has now become a handy tool to monitor the student progression in the university examinations. Students involved in this project gained hands on experience as the data is very huge and has live applications.

5. **Resources**: Examination results compiled by the Departments, University website and Semester Grade reports of the University are used in this Student Result Management System. Mathematics & Computer Science faculty & students are actively involved in this project.

STUDENT AS A ORGANIZER

1. **Objective of the Practice**: To encourage the students to imbibe the leadership qualities in natural environment.

2. **Need Addressed and the Context**: As the country is in need of true leaders, it is believed that the competitive spirit would always enhance the inner capabilities of the individuals through pervasiveness attitude. When the work is rightly shared among the stake holders which would lead to fruitful results and helping the institution to flourish in all aspects. To cultivate these qualities among the students, they are encouraged to organize various programs.

3. **The Practice**: To inculcate leadership qualities among the students Class representatives system was introduced. The Class Representatives are actively involved to organize the celebrations of the birth anniversaries, death anniversaries commemorating the greatest personalities our nation and other days of national and regional importance. They help the faculty and In charges of the departments in organizing various important programs in the College. The faculty supervises and guides the students in organizing those programs.

4. **Evidence of Success:** The direct participation and management of the programs enriched the skills of observation, understanding among the students and way of interaction with others improved a lot. It helped them to bring out inherent natural qualities for their all-round development. For instance, Ushashwini, Lalitya, Kirtana, Vaishnavi, Mamata, who enthusiastically participated in organizing the programs were excelled in oratory skills, resultantly they could participate and won the recognition at the state and national level competitions. Keertana and Lalithya were benefited from those programs and now working on local TV channels as anchors and news readers. Similarly, these programs helped other students to gain confidence with their perseverance becoming self sufficient and independent women with due focus on their education.

5. **Resources**: Enthusiastic students under the guidance of able faculty members, Calendar with days of impotence, Regular discussions over the greatest personalities of the country during the lectures of the faculty, huge student strength of the college are the resources for this practice.
