# ACTIVITIES

### HAND WASH VS. HAND SANITISER

Hand washing for 20 seconds washes away germs	Rubbing hands with sanitiser kills germs
It is recommended to wash hands frequently, if there is water available	Sanitisers are used when there is no water available
Hand washing effectively removes germs if your hands are visibly dirty	Sanitisers are effective in killing germs to other people
Hand washing can reduce the amounts of all kinds of germs, chemicals and grease on your hands significantly	Hand sanitiser may not be effective if hands are soiled or greasy
For hand washing, you need the availability of soap and water	Sanitisers are portable and easy-to-use
You can't wash hands anywhere and everywhere	Sanitisers must be in your pocket/purse and should be used after touching any object
