## Techniques for Enhancing Speaking Skills of Technical Students

Mattalash Yadav

of communication has a very significant social purpose has attained the highest degree of prominence. In the current scenario we can analyse the importance of speaking skills irrespective of the fields like educational, industrial, hospital etc. where it has its own impact. Language is the tool for human interaction. Speaking is the most important interaction to take place. Technical communication has become the goal of technical organisations effectively and successfully. Having subject-specific knowledge and problem-solving skills is not only and competently to work in a universal environment. Communication is the most essential skill for technical students. Technical students are facing challenges at this point where they are becoming result-oriented markers. One must give emphasis on speaking to communicate well in this global world. The speaker must have the skills of speaking skills in the technical field and ask technical questions to develop speaking skills.

# ENGLISH LANGUAGE TEACHING

6

With the globalisation of English, there is a growing demand for competent English language education around the world. India is no exception where English is used as a secondary language. Consequently, there is an exponential demand for highly competent English teachers who can use the various approaches, techniques and methods in effectively teaching English to students. In various academic and professional programmes, English is the most important subject and students are required to study English intensively and comprehensively. The edited book titled English Language Teaching: Innovations and Approaches in Teaching and Learning English is a comprehensive and up-to-date text on the state-of-the-art of contemporary English language teaching and learning. The book gives a deeper insight into the various approaches, techniques and methods in teaching and learning English as a second language. It contains chapters written by expert chapters in the area of English language teaching, comprising a wide range of interesting topics. Each chapter is well written in a conversational style for better readability and effective English language teaching and learning.
