Online National Level e-Poster Competition

On

"Environmental Influences and Biodiversity"

Organized by

Department of Botany & Zoology

Under the Aegis of

Internal Quality Assurance Cell (IQAC)

Conveners

Chief Patron

P. Ramachandra Rao Principal (FAC)

K. Vijaya Kumar

Assistant Professor HOD, Department of Botany & IQAC Coordinator

K. Ravi Kumar

HOD, Department of Zoology

Co-Convener

G.Veeranna

Assistant Professor HOD, Department of Chemistry

About Online National level e-poster Competition:

Biodiversity the diversity of life on Earth is essential to the healthy functioning of ecosystem. Habitat loss and over exploitation, driven by our rapid population growth, are the primary causes of biodiversity loss which is now happening up to ten thousand times faster than for millions of years before. IPBES 2019 report states that one million species are now at risk of extinction and according to IUCN Red list of threatened species 25% mammals, 34%conifers, 13% birds and 27% crustaceans are threatened with extinction. Due to endless production of green house gasses we are headed for a 3°C warmer climate. Pollution disturbs the natural behaviour of many species of plants and animals. Diversity of organisms in the soils allows nutrient recycling. Biodiversity also allows plants to be pollinated by different types of insects.

As U.N. declared Biodiversity decade 2011-2020 is going to end leading to transition phase for the start of other new pivotal biodiversity decade for the period of 2021-2030 awareness on issues of Biodiversity still is on focus. U.N. proclaimed May 22 as the International Day of Biological Diversity (IBD) to increase

understanding and awareness on biodiversity issues and celebration of Biodiversity Week from 18th to 22nd May 2020. On this backdrop we invite students from all disciplines to participate in the National level on line e-Poster competition on "Environmental influences and Biodiversity"

The main focus of this e-Poster competition is to bring awareness on value of biodiversity and impact of climate change on Biodiversity. Students (UG/PG/Scholars) of all disciplines best utilize the COVID-19 Lockdown time and share your ideas through e-Poster.

Advisory committee:

Dr.M. Madhusudan Rao. M.Sc., Ph.D

Reader of Botany (Retired)

Dr.M. Estari M.Sc., Ph.D Assistant Prof of Zoology

Kakatiya University, Warangal

Dr.P. Muralidhar Reddy M.Sc.,Ph.D,Assistant Prof of Chemistry,Osmania University,Hyderabad.

About College:

J.V.R Government College was established in 1976 is one of pioneering institutions in Telangana that made a lasting impression in higher education. The college transformed by translating its mission and vision in to action in becoming a premier institution imparting value based education. Besides making students globally competent, college is actively involved in community development activities and promoting social responsibilities and good citizenship role among students. Accredited with NAAC B" Grade, recently got ISO 9001 Certification and with RUSA 2.0 works under progress college is aiming at taking students to the next level with global skill set.

Instructions:

Poster making and submission of poster:

The Digital poster or hand drawn poster which had not been submitted earlier elsewhere and should be original in content. Submit your eposter by taking clear photo or soft copy and mail to the e-mail id: jvronepc20@gmail.com

Attach image of Poster or e-poster in JPEG format only. Entries will be rejected if file in other formats. Name of the participant with Institution name should be clear and compulsory for issue of certificates.

Registration Fee and Certificate:

There is 'No Fees' and participants should register through the link. Prizes for best three posters will be given memento and certificate and will be sent to their institution. Decision of the online Adjudication committee will be final and no claims would be entertained. E-Certificates will be issued to all participants.

Link for Registrations:

https://forms.gle/sbzdvxaFctcgzbLm8

Themes for e-poster presentation:

Participants may select any of the themes for e-Poster.

- 1. Biodiversity and its value.
- 2. Biodiversity loss, Climate change and Land Degradation.
- 3. Food, health and Biodiversity.
- 4. Biodiversity, People and Culture.
- 5. COVID-19 Pandemic Lockdown is a Boon for Nature and Biodiversity.

- 6. Conservation of Biodiversity
- 7. Our solutions are in Nature
- 8. Biodiversity of Mangroves

Important dates:

All participants after registration should submit e-posters from 18th May Up to 22nd May 2020 11.59 p.m. only. After that, they are not accepted.

Results will be declared on *25th May 2020*. Results would be e-mailed to the participants.

Organizing committee:

Sri.K.Kiran Kumar, Vice-Principal

Dr.B Vinod Kumar, Assistant Prof of Economics Sri.M.Rambabu, Assistant Prof. of English Sri.G.Veera Reddy, HOD, Department of Computers Sri.M.Satyanarayana, TSKC.

J.V.R GOVERNMENT COLLEGE, SATHUPALLY, 507303, Khammam Dist.

Online National e-Poster Competition on "Environmental influences and Biodiversity"

In commemoration of International Biological Diversity Day (IBD) on May 22, 2020 and U.N decade on Biodiversity 2011-2020, **Departments of Botany and Zoology under the aegis of Internal Quality Assurance Cell (IQAC) of J.V.R Government College, Sathupally** conducted Online National e-Poster Competition during the Biodiversity Week 18-22May, 2020.

A total of **217 entries** from various disciplines of Degree (U.G), P.G and Research Scholars from **across12 States** were received on various themes of the competition on Biodiversity.

Best three E-posters from Degree, Post-graduation and Researchscholar's categories were selected by adjudication committee and results were released by Principal Sri.P.Ramachandra Rao today

Research Scholars Category

Ist Place:

SATHISH MOHABE, Yogi Vemana University, Kadapa (A.P)

2nd Place:

DHEEBAN SHANKAR P. Bharathiar University, Coimbatore (T.N)

3rd Place:

DR.R.SAMPATH KUMAR, Arignar Anna Government Arts College, Cheyyar (T.N).

P.G. Students Category

Ist Place:

SAMIKSHA PRALHADRAO BIDKAR,

Sri Shivaji Science College, Amravati, (Maharastra)

2nd Place:

DIVYA SONI, Dr.C.V Raman University, (Chattisgarh).

3rd Place:

SALONI NINAD DEVLEKAR, Institute of Science, (Mumbai)

Degree(U.G) Students Category

Ist Place:

B. RUKMINI, GIRRAJ GOVT COLLEGE (AUTONOMOUS), NIZAMABAD

2nd Place:

ASHA.Y Little Flower Degree College, Hyderabad

3rd Place:

- 1. RISHITA JALADI, Mary Stella College, Vijayawada
- 2. NIDHI YOGESH SHINDE Patkar College, Mumbai

Conveners of Competition K.Vijaya kumar, Assistant Prof of Botany&IQAC Coordination and K.Ravikumar,Zoology department stated that this online National level e-poster competition got good response during this lock down period and created awareness on various issues of Biodiversity among students. **E-Posters on 'COVID-19 Lockdown a boon to nature and Biodiversity'** received much attention and students presented sustainable ideas on the current topic.

Principal Sri.P.Ramachandra Rao stated that response from even remote, rural students to this competition is an example that students use of Online resources increased post COVID-19 and further stated that information and posters would be released as Souvenir. He congratulated the Organizing committee for this e-intiative.

National level e-Poster Competition

e-Poster competition - Last date for Registration is May 22,2020 5 p.m.//Submission of e-poster is May 22,2020 11.59 p.m

- * Required

Theme wise key points/issues for poster evaluation

1. Biodiversity and its value:

- General aspects of Biodiversity, types and their importance
- Hot spots of biodiversity etc..

2. Biodiversity loss, climate change and land degradation

- WWF's latest Living Planet Report estimates that we have lost 60% of all vertebrate wildlife populations since 1970. That's more than half of all birds, mammals, reptiles, amphibians and fish gone in just 50 years. During that time, our population has more than doubled, increasing from 3.7 billion to over 7.7 billion today. Invertebrates, while understudied, aren't faring any better.
 - A German study found that flying insect populations (including pollinators) have crashed by three-quarters since 1989, reflecting similar trends around the world.
- Vulnerability assessments have particular meaning in the natural hazards and socioeconomic fields but are used more loosely and encompass a variety of methods in the field of biodiversity and climate change.
- Change in climate has consequences on the biophysical environment such as changes in the start and length of the seasons, glacial retreat, decrease in Arctic sea ice extent and a rise in sea level. These changes have already had an observable impact on biodiversity at the species level, in term of phenology, distribution & populations, and ecosystem level in terms of distribution, composition & function.

3. Food, health and Biodiversity:

- Vulnerable populations including the poor, marginalized, women and children, will likely suffer first and most severely as they often rely more directly on biodiversity and associated ecosystem services for their very survival.
- Food systems depend on biodiversity and the ecosystem services that support agricultural productivity, soil fertility, and water quality and supply.
- Pollinators and pollination are critical for food production and human livelihoods, and directly link wild ecosystems with agricultural production systems.
- Food biodiversity provides necessary nutrients for quality diets and is essential part of local food systems, cultures and food security.

4. Biodiversity People and Culture:

- Biodiversity is the source of our cultural and spiritual enrichment. Species, genetic diversity and diversity of ecosystems are frequently integral to religious, cultural and national identities.
- The particular relationship between indigenous peoples and nature has enabled them to conserve the largest percentage of the Earth's biodiversity. On the other hand, many relationships between humans and nature occur in urban areas.
- Bridging gap between cultures is urgent and necessary for peace. Cultural biodiversity is an asset in achieving sustainable development
- Emphasis on values of humanism instead of theism

5. Covid-19 lockdown is boon for nature and biodiversity

- Key environmental indices, which have steadily deteriorated for more than half a century, have paused or improved.
- In China, the world's biggest source of carbon, emissions were down about 18% between early February and mid-March a cut of 250m tonnes, equivalent to more than half the UK's annual output. Significant falls can also be expected in the US, where passenger vehicle traffic its major source of CO₂ has fallen by nearly 40%. Even assuming a bounce back once the lockdown is lifted, the planet is expected to see its first fall in global emissions since the 2008-9 financial crisis. Nevertheless, while our species is in temporary retreat during the lockdowns, wildlife has filled the vacuum.
- This year will almost certainly see a much lower toll for road kill by cars and trucks, which – in the UK alone – annually takes the lives of about 100,000 hedgehogs, 30,000 deer, 50,000 badgers and 100,000 foxes, as well as barn owls and many other species of bird and insect.
- Improvement in air quality

New Delhi was ranked as the most polluted city in the world by WHO in May 2014. The usual air quality of India's national capital according to the air quality index used to be 200. When the pollution level hit its peak, the pollution level soared to 900 and sometimes, off the measurable scale.

While 200 itself is 25 percent above unsafe level as deemed by World Health Organization, but as Delhi's 11 million registered cars were taken off the roads and factories and construction were ground to a halt, AQI levels have regularly fallen below 20. The skies are suddenly a rare, piercing blue. Even the birdsong seems louder.

The number of flamingos increased in Mumbai

On April 23, 2020, Copernicus Atmosphere Monitoring Service (CAMS), the European Union's earth monitoring program me, announced that the largest hole ever observed in the

ozone layer over the Arctic has closed. CAMS has been closely following the one million square km-wide ozone layer hole that had formed over the Arctic in March.

Several people on the CAMS Twitter handle said the phenomenon is the outcome of the global Covid-19 lockdown. The agency then clarified that it has nothing to do with the lockdown.

"This Arctic ozone hole actually has nothing to do with coronavirus-related lockdowns, but rather was caused by an unusually strong and long-lived polar vortex," CAMS tweeted.

6. Conservation of biodiversity:

- Areas that are covered as a result of harmonious relationship between nature and humans
- In situ conservation-National parks, Wildlife Sanctuaries and other protective areas
- Ex-situ conservation of biodiversity involves the breeding and maintenance of endangered species in artificial ecosystems such as zoos, nurseries, botanical gardens, gene banks, etc. There is less competition for food, water and space among the organisms.
- The levels of pollutants should be reduced in the environment.
- Deforestation should be strictly prohibited.
- Environmental laws should be followed strictly.
- The useful and endangered species of plants and animals should be conserved in their nature as well as artificial habitats.

7. Our solutions are in nature

- Despite all our technological advances we are completely dependent on healthy and vibrant ecosystems for health ,food, water, medicine, clothes food shelter
- Nature based solutions with biodiversity safe guards mitigation, resilience and adaptation in several critical areas, including the conservation and restoration of forest and other terrestrial ecosystems; the conservation and restoration of freshwater resources as well as marine and ocean ecosystems;
- Sustainable agriculture and food systems; and, ensuring nature's systemic role in sustainable development in ways that halt biodiversity loss, help mitigate and adapt to climate change, as well as optimizing nature's contribution for, among other things, resilient livelihoods, green infrastructure, and sustainable settlements.
- Build back better
- Bend the curve

8. Biodiversity of Mangroves

- A total of 70 species of true mangroves are recorded across the globe while India represents a total of 125 species including 39 species of true mangroves and 86 species of associates. The highest species diversity is recorded from Odisha with a total of 101 species while Gujarat harbours 40 species.
- Diversity components of tropical estuaries can refer to the high diversity of species, life histories, habitats and links in food webs, or the diverse pathways of energy flow and nutrient cycles that couple terrestrial and marine ecosystems at the land-sea interface.
- In addition, coastal geomorphologic landforms and geophysical processes represent diverse components that effectively modulate the properties of estuarine ecosystems. These fluctuating environmental conditions of estuaries result in diverse spatial and temporal patterns of habitat utilization by organisms.
- The diverse landforms of coastal regions can be considered as a biodiversity component of mangrove ecosystems. These regions can be classified into distinct geomorphologic units.

Dear Participants,

There has been overwhelming response from students /Scholars and submitted e-posters on the themes of Biodiversity.

All your posters are under Adjudication process online

The results of the Competition will be released on 25th May2020

All the participants who submitted posters will receive e-Participation certificates after results

Hope through this competition awareness on various issue of Biodiversity was created throughout this Biodiversity Week at least in a small way

With regards

Organizing committee

JVRONEPC20

Thank you for your participation!!

NATIONAL LEVEL E-POSTER COMPETITION

ON

ENVIRONMENTAL INFLUENCES AND BIODIVERSITY (18-22 May2020)

RESULTS

Research Scholars Category

Ist Place:

SATHISH MOHABE, Yogi Vemana University, Kadapa (A.P)

2nd Place:

DHEEBAN SHANKAR P. Bharathiar University, Coimbatore (T.N)

3rd Place:

DR.R.SAMPATH KUMAR, Arignar Anna Government Arts College, Cheyyar (T.N).

P.G. Students Category

Ist Place:

SAMIKSHA PRALHADRAO BIDKAR , Sri Shivaji Science College,Amravati,Maharastra

2nd Place:

DIVYA SONI, Dr.C.V Raman University, Chattisgarh.

3rd Place:

SALONI NINAD DEVLEKAR, Institute of Science, Mumbai

Degree(U.G) Students Category

Ist Place:

BADAVATH RUKMINI, GIRRAJ GOVT COLLEGE (AUTONOMOUS), DUBBA, NIZAMABAD

2nd Place:

ASHA.Y Little Flower Degree College, Hyderabad

- 1. RISHITA JALADI, Mary Stella College, Vijayawada
- 2. NIDHI YOGESH SHINDE Patkar College, Mumbai

-(JVRONEPC20)

Above winners are informed to mail your Exact College/Institution address with pin code to send Mementoes in one week.

National Level e-Poster Contest on Biodiversity-Feedback Form

Environmental Influences and Biodiversity: conducted 18-22 May 2020 (Bio Diversity Week)

*	Required	
1.	Email *	
2.	Enter your Name *	
J۱	VRONEPC20	Don't forget every bird, bug, or tree.Biodiversity is the Key.

BIODIVERSITY LOSS, CLIMATECHANGE AND LAND DEGRADATION

3.	Do you think this Biodiversity Competition is multidisciplinary and students from all disciplines like Arts,Commerce,Science and Others can participate? *
	Mark only one oval.
	Yes
	No
4.	Three levels Degree,Post-graduation and Research scholars categories made easy for you to compete? *
	Mark only one oval.
	Yes
	No

5.	Coinciding with Biodiversity Week and 'International Biodiversity Day'this Competition created more awareness on issues of Biodiversity than at other time of year? *
	Mark only one oval.
	Yes
	No
6.	How do you rate this e-Poster competition *
	Mark only one oval.
	Good
	Very good
	Excellent
7.	Do you think e-Poster contest made best utilize free time during this lock down? *
	Mark only one oval.
	Yes
	◯ No
8.	Do you think Post COVID19 there will be sustainable changes in Nature and
	Biodiversity *
	Mark only one oval.
	Yes
	No No
	May be

9.	Do you think you participated and able to share your ideas only because of its Online mode ? *
	Mark only one oval.
	yes No
10.	How do you rate response of Organizing committee /Conveners in clearing Participant's doubts: * Mark only one oval.
	Average Good Very good
	Excellent

11. Any overall feedback on Contest?

 Do you agree with this and willing to sensitize others on conservation of Biodiversity *

I can't imagine anything more important than air, water, soil, energy and biodiversity.
These are the things that keep us alive.

—

Mark only one oval.

— Yes
— No

e-poster contest on biodiversity

Khammam: The Internal Quality Cell of JVR Government Degree College in Sattupalli is organizing online National Level e-Poster Competition on "Environment Influences and Biodiversity" in commemoration of International Biological Diversity Day (IBD) on May 22. As part of it, the College is inviting the students of all disciplines of degree, post-graduation and research scholars in the country to submit their themes through e-poster on the subjects including biodiversity and its value, loss of biodiversity, conservation, Cultural Biodiversity, Mangrove Biodiversity besides Covid-19 lockdown, a boon to nature and biodiversity. Soft copies of eposter or hand drawn posters in JPEG format can be emailed to jvronepc20@gmail.com after registration online. The aspirants can send it before 22 May. 2020. One of the Convenor of the competition K Vijaya Kumar said that there is no entry fee for it and about 120 entries across 10 states were received so far for it. It is aimed at to create awareness on various issues among students in the lockdown period. Best three posters would be selected by adjudication committee.
